2011 Vehicle Stops Report

Attorney General Chris Koster

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The analysis of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

ANALYSIS BY ATTORNEY GENERAL KOSTER

Twelve years ago Missouri released its first report on vehicle stop data. This report represents the twelfth annual analysis of vehicle stop data in Missouri, a review that includes information about 1,654,360 million stops by law enforcement in the state during 2011. The report can be compared to data going back to 2000 on the Attorney General's Web site at ago.mo.gov.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010 and 2011 analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data.

The overall number of stops reported decreased in 2011. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased slightly from 1.61 in 2010 to 1.63 in 2011. At the same time, the disparity index for Hispanic drivers decreased from .78 in 2010 to .65 in 2011. However, both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African- American drivers in Missouri. Specifically, the disparity indexes for African-American drivers have increased in each of the last six years except 2010, exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007, 1.59 in 2008 and 1.62 in 2009, a slight decrease in 2010 to 1.61, and then a slight increase in 2011 to 1.63. In fact, the disparity rate for African-American drivers has gone down only twice in the history of the report, and then only slightly, to 1.34 in 2004 from 1.36 in 2003 and to 1.61 in 2010 from 1.62 in 2009. Stated another way, the disparity index for African-American drivers has increased in ten of the last twelve years. The 2011 disparity rate of 1.63 compares to a rate of 1.27 twelve years ago. African-American drivers were 63 percent more likely than white drivers to be stopped based on their proportion of driving-age population in 2011, compared to 30 percent more likely than white drivers in 2000.

With 631 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does provide both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment through laws that require each law enforcement agency not only to have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2011 increased to 25. This represents an increase from 2010 when 24 departments failed to report. Failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about

factors that may impact their numbers. The reader should consider these factors when examining the data.

Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ethnic groups and law enforcement officers from throughout the state agree with me.

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2011 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,730,501	3,914,998	515,828	139,109	80,677	19,168	60,721
Stops	1,654,360	1,301,179	293,345	31,452	13,995	1,347	13,042
Searches	128,547	91,772	31,692	3,805	575	98	605
Arrests	81,345	54,005	23,734	2,824	343	73	366
Statewide population %	100%	82.76%	10.90%	2.94%	1.71%	.41%	1.28%
Disparity index	- - -	.95	1.63	.65	.50	.20	.61
Search rate	7.77%	7.05%	10.80%	12.10%	4.11%	7.28%	4.64%
Contraband hit rate	22.52%	24.42%	18.42%	13.51%	14.09%	13.27%	15.70%
Arrest rate	4.92%	4.15%	8.09%	8.98%	2.45%	5.42%	2.81%

Notes: Population figures are 2010 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 631 law enforcement agencies in Missouri for calendar year 2011. An additional 44 agencies indicated they made no traffic stops during the year. This represents 96% of the 705 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,654,360 traffic stops, resulting in 128,547 searches and 81,345 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 years-old and older. **Footnote 2**

A value of 1 on this index indicates that a group's proportion of vehicle stops equals its population proportion: it is neither "under-represented" nor "over-represented" in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,301,179 whites who were stopped accounted for 78.6 percent of all vehicle stops in 2011.

Whites comprise an estimated 82.8 percent of Missouri's driving age population. The value for whites on the disparity index is, therefore, .95 (.786/.828). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and older.

The same is not the case for African-Americans. African-Americans represent 10.90 percent of the population 16 and older but 17.73 percent of all vehicle stops, for a value on the disparity index of 1.63. African-Americans were stopped at a rate 63 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics, Asians, American Indians, and persons of mixed or unknown race were stopped at rates well below their proportion of the driving-age population. The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.72 times that of a white motorist (1.63/.95). In other words, African-Americans were 72 percent more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2011.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways. A group's share of the residential population 16 and older may or may not equal its proportion of drivers.

Although in most instances the two proportions should be close, that may not always be the case.

The extremely low Disparity Index value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.8 percent. Asians were searched at a rate well below the statewide average, and African-Americans and Hispanics were searched at rates above the average for all motorists who were stopped.

The search rates for the groups also can be compared directly with one another. African-Americans were 1.53 times more likely to be searched than whites (10.80/7.05). Hispanics were 1.72 times more likely than whites to be searched (12.10/7.05).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 22.5 percent of all searches conducted in 2011. There is considerable variation, however, in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 24.4 percent, compared with 18.4 percent for African-Americans and 13.5 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 5 percent of all vehicle stops resulted in an arrest (81,345/1,654,360). The probability of arrest varies across the race and ethnic groups.

Approximately 8.1 percent of the stops of African- Americans and nearly 9.0 percent of the stops of Hispanics resulted in arrest, compared with about 4.2 percent of the stops of whites. African-Americans and Hispanics are searched more often than whites, but they are arrested more often as well.

There are two appendices to this year's full report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2011 disparity index to the disparity indexes for 2000 through 2010. 3 These comparisons are presented in Appendix B.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2011. For the state as a whole, the key indicators generally show small changes between the years 2010 and 2011.

The search rate (the percentage of stops in which a search is conducted) increased for white drivers from 5.67 in 2010 to 7.05 in 2011, increased slightly for African- Americans and Hispanics and exhibited a somewhat greater decline for American Indians and Asians. The arrest rate for African-Americans dropped slightly (from 8.43 percent to 8.09 percent) and somewhat more for Hispanics (from 9.89 percent to 8.98 percent) between 2010 and 2011.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

Twelve years ago Missouri released its first report on vehicle stop data. This report represents the twelfth annual analysis of vehicle stop data in Missouri, a review that includes information about 1,654,360 million stops by law enforcement in the state during 2011. The report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010 and 2011 analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data.

The overall number of stops reported decreased in 2011. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased slightly from 1.61 in 2010 to 1.63 in 2011. At the same time, the disparity index for Hispanic drivers decreased from .78 in 2010 to .65 in 2011. However, both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African- American drivers in Missouri. Specifically, the disparity indexes for African-American drivers have increased in each of the last six years except 2010, exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007, 1.59 in 2008 and 1.62 in 2009, a slight decrease in 2010 to 1.61, and then a slight increase in 2011 to 1.63. In fact, the disparity rate for African-American drivers has gone down only twice in the history of the report, and then only slightly, to 1.34 in 2004 from 1.36 in 2003 and to 1.61 in 2010 from 1.62 in 2009. Stated another way, the disparity index for African-American drivers has increased in ten of the last twelve years. The 2011 disparity rate of 1.63 compares to a rate of 1.27 twelve years ago. African-American drivers were 63 percent more likely than white drivers to be stopped based on their proportion of driving-age population in 2011, compared to 30 percent more likely than white drivers in 2000.

With 631 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does provide both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment through laws that require each law enforcement agency not only to have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2011 increased to 25. This represents an increase from 2010 when 24 departments failed to report. Failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ethnic groups and law enforcement officers from throughout the state agree with me.

[**back to top**]

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: The population totals in the table are from the 2010 Census.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Revised September 2004

Title 15—ELECTED OFFICIALS
Division 60—Attorney General
Chapter 10—Reporting of Motor Vehicle Stops by Law Enforcement Agencies

15 CSR 60-10.010 Definitions

PURPOSE: This rule advises the public of the definitions adopted for certain terms which are used in section 590.650, RSMo, and the rules promulgated thereunder.

(1) The term "law enforcement agency," as used in section 590.650, RSMo, shall mean the state highway patrol, any state, county, or municipal department or office that employs peace officers who stop drivers of motor vehicles for violations of any motor vehicle statute or ordinance.

(2) The term "peace officer," as used in section 590.650, RSMo, shall mean any member of the state highway patrol, any state, county, or municipal law enforcement officer possessing the duty and power of arrest for violation of any criminal laws of the state or for violation of ordinances of counties or municipalities of the state who serve full-time, with pay.

(3) The term "search," as used in section 590.650, RSMo, shall mean any action of a peace officer, arising out of a motor vehicle traffic stop, that infringes upon an individual's reasonable expectation of privacy.

(4) The term "Terry stop" shall mean a stop of an individual where specific and articulable facts, together with all rational inferences, suggest that the driver is involved in criminal activity. A Terry stop is an investigatory stop that is not an arrest and can be justified by less than the probable cause necessary for an arrest.

(5) The terms "Terry frisk" or "Terry search" shall mean a limited pat-down or frisk of the driver or his or her automobile for weapons which occurs when there are specific and articulable facts which, taken together with rational inferences from those facts, would lead a peace officer reasonably to believe the driver is armed and presently dangerous to the officer or others.

AUTHORITY: section 590.650, RSMo 2000. Emergency rule filed Aug. 21, 2000, effective Aug. 31, 2000, expired Feb. 23, 2001. Original rule filed Aug. 21, 2000, effective March 30, 2001.*

**Original authority: 590.650, RSMo 2000.*

15 CSR 60-10.020 Report to Attorney General by Law Enforcement Agencies

PURPOSE: Section 590.650, RSMo, requires law enforcement agencies to compile and report certain information to the Attorney General. This rule provides instructions regarding the information to be reported pursuant to section 590.650, RSMo.

(1) On or before March 1 of each year, law enforcement agencies shall compile the information collected pursuant to section 590.650.2, RSMo, and enumerated in this rule, and such other information as the Attorney General may require, into a report to the Attorney General. The information contained in the report shall be for the preceding calendar year.

(2) The first reporting period during which law enforcement agencies are required to compile and report the information required by section 590.650.2, RSMo, and enumerated in this rule, and such other information as the Attorney General may require, shall begin on August 28, 2000, and end on December 31, 2000.

(3) Beginning on January 1, 2001, and thereafter, the reporting period during which law enforcement agencies are required to compile and report the information required by section 590.650.2, RSMo, and enumerated in this rule, and such other information as the Attorney General may require, shall begin on January 1 and end on December 31 of each year.

(4) Each law enforcement agency shall compile the following information in the manner described in section (5) of this rule for submission to the Attorney General. The information shall pertain to the total number of times peace officers employed by the law enforcement agency stopped drivers of motor vehicles for violations of any motor vehicle statutes or ordinances, and shall include:

(A) The age, gender and race or minority group of each individual stopped.

1. For the total number of stops made during the reporting period, indicate the races or minority groups of the drivers using one (1) of the following categories: White; Black/African-American; Hispanic/Latino; American Indian/Alaska Native; Asian; or Other/Unknown. For the purposes of reporting this information, the races or minority groups of the drivers shall be based upon the peace officers' visual observations.

2. For the total number of stops made during the reporting period, indicate the number of male drivers stopped and female drivers stopped.

3. For the total number of stops made during the reporting period, indicate the age groups of the drivers stopped;

(B) The total number of traffic violations alleged to have been committed that led to the stops.

1. For the total number of stops made during the reporting period, indicate the number of stops resulting from moving violations, equipment violations or license violations. A stop may include more than one (1) alleged violation.

2. For moving violations, indicate the nature of the violation: speed; lane violation; following too close; commercial vehicle enforcement (CVE); fail to signal; or other;

(C) The total number of searches conducted as a result of the stops.

1. For the total number of stops made during the reporting period, indicate the number of searches made, including the number of property searches, the number of drivers searches, and the number of searches of both drivers and thier property;

(D) The total number of searches conducted, including the number of consent searches, the probable cause for the searches and the durations of all searches.

1. For the total number of searches made during the reporting period, indicate whether the probable cause or authority for the searches included the following: consent; odor of illegal drugs or alcohol; plain view contraband; inventory search; incident to arrest; reasonable suspicion (weapon); or other. For any search, one (1) or more of these categories may apply.

2. For the total number of searches made during the reporting period, indicate the lengths of the searches. The duration of search means the time needed to conduct any and all searches;

(E) THe number of searches during which contraband was discovered, and the types of any contraband discovered during the searches.

1. For the total number of searches made during the reporting period, indicate the number of times contraband was discovered and, when contraband was discovered, indicate the types of contraband discovered using the following categories: illegal drugs or paraphernalia; currency; stolen property; weapons; or other;

(F) The total number of warnings, citations, and arrests resulting from the stops.

1. For the total number of stops made during the reporting period, indicate the number of stops resulting in the following: warnings; and citations;

(G) The total number of warnings and citations issued.

1. For the total number of stops made during the reporting period, indicate the violations charged or warnings given;

(H) The total number of arrests made and the crimes alleged

1. For the total number of arrests resulting from either the stops or any searches conducted as a result of the stops during the reporting period, indicate the types of crimes alleged using the following categories: outstanding warrant; drug violations; resisting arrest; offense against person; property offense; driving while intoxicated/blood alcohol content; or other. An arrest may include more than one (1) alleged crime;

(I) The locations of the stops.

1. For the total number of stops made during the reporting period, indicate the number of stops made at the following locations: interstate highway; U.S. highway; state highway; county road; city street; or other. For purposes of reporting this information, "location" means the location where the officer observed the alleged violation and signaled the driver to stop, not the location where the driver physically stopped the vehicle;

(J) Total number of vehicle stops made by that agency.

1. This number represents the total number of vehicles stopped by officers in the particular law enforcement agency for alleged motor vehicle violations, whether moving violations, equipment violations, or license violations. This total does not include motor vehicle stops made for reasons other than alleged motor vehicle violations; and

(K) The law enforcement agency jurisdiction in which each driver of a stopped vehicle resides.

1. For the total number of stops made during the reporting period, indicate whether the driver stopped is a resident of the law enforcement agency's jurisdiction.

(5) The information described in section (4) of this rule shall be compiled and broken down according to the races or minority groups of the drivers stopped.

(6) The law enforcement agency head, director, or administrator shall sign each agency report and shall indicate the agency name, agency Originating Agency Identifier (ORI) number, and the date the report was submitted to the Attorney General's Office.

(7) The report shall be submitted on forms furnished by or approved by the Attorney General.

AUTHORITY: section 590.650, RSMo 2000. Emergency rule filed Aug. 21, 2000, effective Aug. 31, 2000, expired Feb. 23, 2001. Original rule filed Aug. 21, 2000, effective March 30, 2001. Rescinded and readopted: Filed July 31, 2001, effective Jan. 30, 2002.*

**Original authority: 590.650, RSMo 2000, amended 2001.*

15 CSR 60-10.030 Reporting Forms

PURPOSE: This rule provides forms used for the compilation and reporting of information on motor vehicle stops by law enforcement agencies.

(1) Law enforcement agencies are required, pursuant to section 590.650, RSMo, and 15 CSR 60-1.020 to compile information about motor vehicle stops for submission to the Attorney General.

(2) No report from a law enforcement agency shall be deemed to be in compliance with section 590.650, RSMo, unless the report contains a compilation of the information enumerated in 15 CSR 60-10.020 and such other information as the Attorney General may require.

(3) No report from a law enforcement agency shall be deemed to be in compliance with section 590.650, RSMo, unless the report is signed by the law enforcement agency head, director, or administrator.

(4) The compiled information shall be broken down by races or minority groups of the drivers stopped.

(5) The report to the Attorney General shall be made on a form furnished by or approved by the Attorney General. The reporting form may, at the discretion of the Attorney General, be made available on the Internet.

(6) The Attorney General may create informal guidelines for compliance with the reporting form. The guidelines may, at the discretion of the Attorney General, be made available on the Internet.

AUTHORITY: section 590.650, RSMo 2000. Emergency rule filed Aug. 21, 2000, effective Aug. 31, 2000, expired Feb. 23, 2001. Original rule filed Aug. 21, 2000, effective March 30, 2001. Rescinded and readopted: Filed July 31, 2001, effective Jan. 30, 2002.*

**Original authority: 590.650, RSMo 2000, amended 2001.*

  - Question 3 on the form: Why does driver's race/minority status recommend that an officer's visual observation determine the response?
  - Question 6 on the form: For location of vehicle stop, should an officer check "city street" if a stop is made on a state highway that runs through a city?
  - Question 7 on the form: If an officer conducts a passenger-only search, should the officer indicate that a search was conducted?

When is the annual report for law enforcement agencies

for 2009 vehicle stops due?

The report from law enforcement agencies is due **March 1, 2010**. The Attorney General requests that all law enforcement agencies **electronically file** their annual reports. A letter providing agencies with a password to complete the submission will be sent to all agencies in mid-December. If your agency still needs a password, please call or **e-mail Cindy Lowry** at **573-751-8828**. Once you go online and enter your password, you will need to complete the mandatory annual report form and six vehicle stops by race forms.

[**back to top**]

If my law enforcement agency used a private vendor to compile vehicle stop data, does my agency still need to submit data on the Attorney General's annual report form?

Yes. Under **Section 590.650 of Missouri Revised Statutes**, the Attorney General determines the format of the annual report. All agencies, even those that used private vendors to help compile information, should use the Attorney General form. This will ensure that we have consistent data statewide.

[**back to top**]

Vehicle stop information form

The **vehicle stop information form** is not required by state law or regulations. However, information on this form is required on the annual report form.

Which stops are counted on the traffic forms?

Your law enforcement agency needs to report to the Attorney General's Office only those stops made for alleged motor vehicle violations or for investigative purposes. Other stops, such as those made at checkpoints, are not included in the year-end report.

[**back to top**]

Question 1 on the form: Does the total number of reasons for stops (moving, equipment, license, investigative) need to equal or exceed the total number of vehicle stops?

Yes. Example: Driver stopped for speeding and no tail light would have two violations — moving and equipment.

[**back to top**]

Question 1 on the form: What does CVE mean under moving violation categories?

CVE means "commercial vehicle enforcement." For example, a violation of Section 304.170, RSMo, relating to width and load restrictions for trucks, would fall under this category.

[**back to top**]

Question 2 on the form: When should the officer check the "No Action" box?

The officer should only check "No Action" when the officer does not issue a citation or a written or verbal warning.

[**back to top**]

Question 3 on the form: Why does driver's race/minority status recommend that an officer's visual observation determine the response?

Departments in other states that track the driver's race for vehicle stops use visual observation for two reasons:

1. If an officer is profiling based on race, that officer is deciding to pull the driver over based on the officer's perception of that driver's race.
2. If the officer questions the driver about his race, the driver may become confrontational or think his rights are being violated.

[**back to top**]

Question 6 on the form: For location of vehicle stop, should an officer check "city street" if a stop is made on a state highway that runs through a city?

The officer should check "state highway." Also, the officer should check the applicable box based on the location where the officer signaled the driver to stop.

[**back to top**]

Question 7 on the form: If an officer conducts a passenger-only search, should the officer indicate that a search was conducted?

No. However, you must check "Yes" if Question 8 (search of driver and/or property) is checked.

Disparity Index

- The **"Disparity Index"** measures the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 16 and over. Values greater than 1 indicate over-representation and values less that 1 indicate under-representation in traffic stops.
- The values in the tables and graphs below represent the disparity index.
- #Error indicates a zero denominator.
- Gaps in the graph represent calculations with a 0 denominator.
- Use the **Report Selection** menu above to view other reports, select other agencies in Cole County, and/or choose which races to display in the graphs.
- Information provided on this site reflects data as reported by each law enforcement agency. Where the numbers reported appeared incomplete or inaccurate, the Attorney General's Office made every effort to verify the data with the reporting agency in order to obtain correct figures.

Missouri Revised Statutes - Section 590.650

Home 2009 Executive Summary Sample Form Rules & Regulations Frequently Asked Questions

Racial profiling--minority group defined--reporting requirements--annual report--review of findings--failure to comply--funds for audio-visual equipment--sobriety check points exempt. 590.650.

1. As used in this section "minority group" means individuals of African, Hispanic, Native American or Asian descent.

2. Each time a peace officer stops a driver of a motor vehicle, that officer shall report the following information to the law enforcement agency that employs the officer:

(1) The age, gender and race or minority group of the individual stopped;

(2) The reasons for the stop;

(3) Whether a search was conducted as a result of the stop;

(4) If a search was conducted, whether the individual consented to the search, the probable cause for the search, whether the person was searched, whether the person's property was searched, and the duration of the search;

(5) Whether any contraband was discovered in the course of the search and the type of any contraband discovered;

(6) Whether any warning or citation was issued as a result of the stop;

(7) If a warning or citation was issued, the violation charged or warning provided;

(8) Whether an arrest was made as a result of either the stop or the search;

(9) If an arrest was made, the crime charged; and

(10) The location of the stop.

Such information may be reported using a format determined by the department of public safety which uses existing citation and report forms.

3.

(1) Each law enforcement agency shall compile the data described in subsection 2 of this section for the calendar year into a report to the attorney general.

(2) Each law enforcement agency shall submit the report to the attorney general no later than March first of the following calendar year.

(3) The attorney general shall determine the format that all law enforcement agencies shall use to submit the report.

4.

(1) The attorney general shall analyze the annual reports of law enforcement agencies required by this section and submit a report of the findings to the governor, the general assembly and each law enforcement agency no later than June first of each year.

(2) The report of the attorney general shall include at least the following information for each agency:

(a) The total number of vehicles stopped by peace officers during the previous calendar year;

(b) The number and percentage of stopped motor vehicles that were driven by members of each particular minority group;

(c) A comparison of the percentage of stopped motor vehicles driven by each minority group and the percentage of the state's population that each minority group comprises; and

(d) A compilation of the information reported by law enforcement agencies pursuant to subsection 2 of this section.

5. Each law enforcement agency shall adopt a policy on race-based traffic stops that:

(1) Prohibits the practice of routinely stopping members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law;

(2) Provides for periodic reviews by the law enforcement agency of the annual report of the attorney general required by subsection 4 of this section that:

(a) Determine whether any peace officers of the law enforcement agency have a pattern of stopping members of minority groups for violations of vehicle laws in a number disproportionate to the population of minority groups residing or traveling within the jurisdiction of the law enforcement agency; and

(b) If the review reveals a pattern, require an investigation to determine whether any peace officers of the law enforcement agency routinely stop members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law; and

(3) Provides for appropriate counseling and training of any peace officer found to have engaged in race-based traffic stops within ninety days of the review.

The course or courses of instruction and the guidelines shall stress understanding and respect for racial and cultural differences, and development of effective, noncombative methods of carrying out law enforcement duties in a racially and culturally diverse environment.

6. If a law enforcement agency fails to comply with the provisions of this section, the governor may withhold any state funds appropriated to the noncompliant law enforcement agency.

7. Each law enforcement agency in this state may utilize federal funds from community-oriented policing services grants or any other federal sources to equip each vehicle used for traffic stops with a video camera and voice-activated microphone.

8. A peace officer who stops a driver of a motor vehicle pursuant to a lawfully conducted sobriety check point or road block shall be exempt from the reporting requirements of subsection 2 of this section.

EXECUTIVE SUMMARY FOR 2010 MISSOURI VEHICLE STOPS

- Background
- Statewide Findings
- Analysis by Attorney General Koster
- View Agency Reports (Adair County - Lee's Summit)
- View Agency Reports (Leeton - Wright County)
- Appendix A: Local traffic stops in proportion to state racial composition
- Appendix B: Disparity indexes for 2000-2010 are compared
- Appendix C: Key indicators using 2000 census figures for each jurisdiction

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2010 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,734,958	3,947,287	508,188	122,083	73,073	24,269	60,058
Stops	1,688,720	1,336,273	292,275	33,825	13,934	1,370	11,043
Searches	111,616	75,780	30,828	4,081	380	94	453
Arrests	83,919	56,372	23,857	3,012	283	77	318
Statewide population %	100%	83.36%	10.73%	2.58%	1.54%	.51%	1.27%
Disparity index	- - -	.95	1.61	.78	.54	.16	.51
Search rate	6.61%	5.67%	10.55%	12.07%	2.73%	6.86%	4.10%
Contraband hit rate	22.13%	24.52%	17.50%	14.36%	13.68%	18.09%	17.44%
Arrest rate	4.97%	4.22%	8.16%	8.90%	2.03%	5.62%	2.88%

Notes: Population figures are 2010 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 630 law enforcement agencies in Missouri for calendar year 2010. An additional 44 agencies indicated they made no traffic stops during the year. This represents 98.3% of the 698 law enforcement agencies in the state. The agencies filing reports recorded a total of 1,688,720 traffic stops, resulting in 111,616 searches and 83,919 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

The population totals in the table are Census estimates for 2010 compiled by Geolytics, Inc. In reports for years prior to 2005, the population totals were from the 2000 Census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U. S. Census Bureau, “are used in federal funding allocations, as denominators for vital rates and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**). **Footnote 2**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index,” relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 years-old and older. A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither "under-represented" nor "over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,336,273 whites who were stopped accounted for 79.1% of all traffic stops in 2010. Whites comprise an estimated 83.4% of Missouri's driving age population. The value for whites on the disparity index is, therefore, .95 (.7913/.8336). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and over.

The same is not the case for several of the other groups. African-Americans represent 10.73% of the population sixteen years and older but 17.31% of all traffic stops, for a value on the disparity index of 1.61. African-Americans were stopped at a rate 61% greater than expected based solely on their proportion of the population sixteen and older. Hispanics were stopped at a rate somewhat below their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population. The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that a black motorist was stopped is 1.69 times that of a white motorist (1.61/.95). In other words, blacks were 69% more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2010.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 16 and over, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 16 and over may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case. The extremely low DI value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate,” or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.) The search rate for all motorists who were stopped is 6.6%. Asians were searched at a rate well below the statewide average, and Blacks, Hispanics, and American Indians were searched at rates above the average for all motorists who were stopped. The search rate for the different groups also can be compared directly with one another. Blacks were 1.86 times more likely to be searched than whites (10.55/5.67). Hispanics were 2.13 times more likely than whites to be searched (12.07/5.67).

The reasons for conducting a search and the outcome of the search (i.e., discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest. Other searches are conducted incident to arrest -- this means that there is no other reason given for the search other than arrest. Searches are almost always performed when

there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 22.1 percent of all searches conducted in 2010. However, there is considerable variation in the contraband hit rate across race and ethnic groups. The contraband hit rate for whites was 24.5 percent, compared with 17.5 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to result in the discovery of contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 5 percent of all vehicle stops resulted in an arrest (83,919/1,688,720). The probability of arrest varies across the race and ethnic groups. Just over 8.2 percent of the stops of African- Americans and 8.9 percent of the stops of Hispanics resulted in arrest, compared with about 4.2 percent of the stops of whites. African-Americans and Hispanics are searched more often than whites, but they are arrested more often as well.

There are three appendixes to this year's full report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction. This year's report compares the 2010 disparity index to the disparity indexes for 2000 through 2009.3 These comparisons are presented in Appendix B. For each agency, the disparity index for each race-ethnic group is presented for 2000-2010. For the state as a whole, the key indicators generally show small changes between 2009 and 2010. The third appendix included with this year's report, Appendix C, presents the key indicators using the 2000 Census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

11 years ago Missouri released its first report on vehicle stop data. This report represents the tenth annual analysis of vehicle stop data in Missouri, a review that includes information about more than 1.7 million stops by law enforcement in the state during 2009. This report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010 statewide analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2010 census information.)

The overall number of stops reported decreased in 2010. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers decreased slightly from 1.62 in 2009 to 1.61 in 2010. At the same time, the disparity index for Hispanic drivers decreased from .81 in 2009 to .78 in 2010, however, both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African- American drivers in Missouri. Specifically, the disparity indexes for African-American drivers increased from 2005 – 2009 exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007 and 1.59 in 2008 and 1.62 in 2009, then a slight decrease in 2010 to 1.61. In fact, the disparity rate for African-American drivers has gone down only one other time in the history of the report again only slightly, to 1.34 in 2004 from 1.36 in 2003. Stated another way, the disparity index for African-American drivers increased in nine out of the last eleven years. The 2010 disparity rate of 1.61 compares to a rate of 1.27 eleven years ago. African-American drivers were 69% more likely than white drivers to be stopped based on their proportion of driving-age population in 2010, compared to 30 percent more likely than white drivers in 2000.

With 630 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does provide both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2010 increased to 24. This represents an

increase from 2009 when 13 departments failed to report. Failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data. Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ethnic groups and law enforcement officers from throughout the state agree with me.

EXECUTIVE SUMMARY FOR 2009 MISSOURI VEHICLE STOPS

- Background
- Statewide Findings
- Analysis by Attorney General Koster
- View Agency Reports (Adair County - Leasburg)
- View Agency Reports (Lebanon - Wyatt)
- Appendix A: Local traffic stops in proportion to state racial composition
- Appendix B: Disparity indexes for 2000-2009 are compared
- Appendix C: Key indicators using 2000 census figures for each jurisdiction

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2009 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,696,178	3,922,991	503,165	117,483	70,913	23,884	57,742
Stops	1,715,792	1,356,039	297,828	34,766	14,342	1,522	11,295
Searches	115,777	79,655	30,690	4,450	386	120	476
Arrests	84,309	58,073	22,494	3,087	253	88	314
Statewide population %	100%	83.54%	10.71%	2.50%	1.51%	.51%	1.23%
Disparity index	- - -	.95	1.62	.81	.55	.17	.54
Search rate	6.75%	5.87%	10.30%	12.80%	2.69%	7.88%	4.21%
Contraband hit rate	20.75%	22.56%	17.22%	13.42%	14.25%	22.50%	18.28%

Arrest rate	4.91%	4.28%	7.55%	8.88%	1.76%	5.78%	2.78%

Notes: Population figures are 2009 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 642 law enforcement agencies in Missouri for calendar year 2009. An additional 44 agencies indicated they made no traffic stops during the year. This represents 98.3% of the 698 law enforcement agencies in the state. The agencies filing reports recorded a total of 1,715,792 traffic stops, resulting in 115,777 searches and 84,309 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

The population totals in the table are Census estimates for 2009 compiled by Geolytics, Inc. In reports for years prior to 2005, the population totals were from the 2000 Census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U. S. Census Bureau, “are used in federal funding allocations, as denominators for vital rates and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**). **Footnote 2**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index,” relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 years-old and older. A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither "under-represented" nor "over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,356,039 whites who were stopped accounted for 79.0% of all traffic stops in 2009. Whites comprise an estimated 83.5% of Missouri's driving age population. The value for whites on the disparity index is, therefore, .95 (.79033/.83536). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and over.

The same is not the case for several of the other groups. African-Americans represent 10.7% of the population sixteen years and older but 17.4% of all traffic stops, for a value on the disparity index of 1.62. African-Americans were stopped at a rate 62% greater than expected based solely on their proportion of the population sixteen and older. Hispanics were stopped at a rate somewhat below their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population. The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that a black motorist was stopped is 1.70 times that of a white motorist (1.62/.95). In other words, blacks were 70% more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2009.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 16 and over, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 16 and over may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case. The extremely low DI value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate,” or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.) The search rate for all motorists who were stopped is 6.8%. Asians were searched at a rate well below the statewide average, and Blacks, Hispanics, and American Indians were searched at rates above the average for all motorists who were stopped. The search rate for the different groups also can be compared directly with one another. Blacks were 1.76 times more likely to be searched than whites (10.30/5.87). Hispanics were 2.18 times more likely than whites to be searched (12.80/5.87).

The reasons for conducting a search and the outcome of the search (i.e., discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest. Other searches are conducted incident to arrest --

this means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 20.8% of all searches that were conducted in 2009. However, there is considerable variation in the contraband hit rate across race and ethnic groups. The contraband hit rate for whites was 22.6%, compared with 17.2% for Blacks and 13.4% for Hispanics. This means that on average searches of Blacks and Hispanics are less likely than searches of whites to result in the discovery of contraband. This difference may result in part from the higher arrest rates for blacks and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 5% of all traffic stops resulted in an arrest (84,309/1,715,792). The probability of arrest varies across the race and ethnic groups. Approximately 7.6% of the stops of African-Americans and 8.9% of the stops of Hispanics resulted in arrest, compared with 4.3% of the stops of whites. African-Americans and Hispanics are searched more often than whites, but they are arrested more often as well.

There are three Appendices to this year's full report. Appendix A presents the traffic stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction. This year's report compares the 2009 disparity index to the disparity index for 2000 through 2008. These comparisons are presented in Appendix B. For each agency, the disparity index for each race-ethnic group is presented for the years 2000-2008. For the state as a whole, the key indicators show small changes between 2008 and 2009. The disparity index is generally stable across the two years, although Hispanics were nearly 15% less likely to be stopped in 2009 than in 2008 (DI = .81 and .95, respectively). The search rate (the percentage of stops in which a search is conducted) decreased for all groups, as did the arrest rate. The third appendix included with this year's report, Appendix C, presents the key indicators using the 2000 Census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

10 years ago Missouri released its first report on vehicle stop data. This report represents the tenth annual analysis of vehicle stop data in Missouri, a review that includes information about more than 1.7 million stops by law enforcement in the state during 2009. This report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

The analysis in 2009, as well as in 2005, 2006, 2007 and 2008, used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported increased in 2009. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased from 1.59 in 2008 to 1.62 in 2009. The disparity index for Hispanic drivers decreased from .95 in 2008 to .81 in 2009, however, both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. Specifically, the disparity indexes for African-American drivers have increased each of the last five years, exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007, 1.59 in 2008 and 1.62 in 2009. In fact, the disparity rate for African-American drivers has gone down only one time in the history of the report, and then only slightly, to 1.34 in 2004 from 1.36 in 2003. Stated another way, the disparity index for African Americans has increased in nine of the last ten years. The 2009 disparity rate of 1.62 compares to a rate of 1.27 ten years ago.

With 642 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. We are continuing that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2009 continued to be relatively low at 13. This represents an increase from 2008 when 11 departments failed to report. Failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ethnic groups and law enforcement officers from throughout the state agree with me.

- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2008 are compared**
- **Appendix C: Key indicators using 2000 census figures for each jurisdiction**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2008 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Population	4,676,322	3,917,100	503,115	106,318	72,334	22,925	54,530
Stops	1,633,610	1,294,198	278,923	35,169	13,097	1,531	10,692
Searches	128,652	90,250	32,376	4,945	427	135	519
Arrests	92,945	65,201	23,520	3,478	297	101	348
Statewide population %	100%	83.76%	10.76%	2.27%	1.55%	.49%	1.12%
Disparity index	- - -	.95	1.59	.95	.52	.18	.56
Search rate	7.88%	6.97%	11.61%	14.06%	3.26%	8.82%	4.85%
Contraband hit rate	19.09%	20.35%	16.57%	13.45%	13.56%	21.48%	14.07%
Arrest rate	5.69%	5.04%	8.43%	9.89%	2.27%	6.60%	3.25%

Notes: Population figures are 2008 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 639 law enforcement agencies in Missouri for 2008. An additional 65 agencies indicated they made no vehicle stops during the year. This represents almost 98.5 percent of the 715 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,633,610 vehicle stops, resulting in 128,652 searches and 92,945 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

The population totals in the table are census estimates for 2008 compiled by Geolytics Inc. In reports for years prior to 2005, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U.S. Census Bureau, “are used in federal funding allocations, **as denominators for vital rates** and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**). **Footnote 2**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the “disparity index,” relates each group’s proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “over-represented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,249,198 whites who were stopped accounted for 79.2 percent of all vehicle stops in 2008.

Whites comprise an estimated 83.8 percent of Missouri’s driving age population. The value for whites on the disparity index is, therefore, .95 (.79223/.83765). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and older.

The same is not the case for several of the other groups. African-Americans represent 10.8 percent of the population 16 and older but 17.1 percent of all vehicle stops, for a value on the disparity index of 1.59.

African-Americans were stopped at a rate 59 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate equal to their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.67 times that of a white motorist (1.59/.95). In other words, African-Americans were 67 percent more likely than whites to be stopped in 2008.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.9 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped.

The search rates for the groups also can be compared directly with one another. African-Americans were 1.67 times more likely to be searched than whites (11.61/6.97). Hispanics were 2.02 times more likely than whites to be searched (14.06/6.97).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. Contraband was found in slightly more than 20 percent of all searches. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 19.1 percent of all searches conducted in 2008. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 20.4 percent, compared with 16.6 percent for African-Americans and 13.5 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 6 percent of

all vehicle stops resulted in an arrest (92,945/1,633,610). The probability of arrest varies across the race and ethnic groups.

Just over 8 percent of stops of African-Americans and nearly 10 percent of the stops of Hispanics resulted in arrest, compared with about 5 percent of the stops of whites.

There are three appendixes to this year's full report. **Appendix A** presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2008 disparity index to the disparity indexes for 2000 through 2007. **Footnote 3** These comparisons are presented in **Appendix B**.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2007. For the state as a whole, the key indicators show very small changes between 2007 and 2008. The disparity index is generally stable across the two years, with a small decrease for Hispanics.

The search rate (the percentage of stops in which a search is conducted) decreased slightly for African-Americans and Hispanics and exhibited a somewhat greater decline for American Indians. The arrest rate for African-Americans dropped slightly (from 9.08 percent to 8.43 percent) and somewhat more for Hispanics (from 11.01 percent to 9.89) between 2007 and 2008.

The third appendix included with this year's report, **Appendix C**, presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Footnote 4

This report represents the ninth annual analysis of vehicle stop data in Missouri, a review that includes information about more than 1.6 million stops by law enforcement in the state during 2008. This report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

The analysis in 2008, as well as in 2005, 2006 and 2007, used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported increased in 2008, after experiencing a decrease in 2007. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased slightly from 1.58 in 2007 to 1.59. At the same time, the disparity index for Hispanic drivers decreased from 1.0 in 2007 to .95 in 2008. Both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. Specifically, the disparity indexes for African-American drivers have increased each of the last four years, exhibiting disparity indexes of 1.42 in 2005, 1.49 in 2006, 1.58 in 2007 and 1.59 in 2008.

With 639 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leading role, under the stewardship of then-Attorney General Nixon, Governor Carnahan and many in the legislature, in passing legislation requiring the collection and examination of vehicle stop data on this scale. I pledge to continue that tradition in carrying on the detailed and critical examination necessary to ensure fairness to Missouri's law enforcement application. It is my hope that this report may serve as a springboard to open dialogue and legislative review.

We continue to show that commitment throught laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports.

The number of agencies that did not comply with the vehicle stops reporting law in 2008 continued to be relatively low at 11. This represents an improvement from 2007 when 22 departments failed to report. Nonetheless, failure to report is unacceptable and should be considered so by the General Assembly. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

Law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I am confident that Missourians of all races and ehtnic groups and law enforcement officers from throughout the state are committed to this agree with me.

[**back to top**]

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: For detailed descriptions of the methodology used in forming the population estimates, see **www.census.gov/popest/estimates.php** and **www.geolytics.com/USCensus,Estimates-Projections,Data,Methodology,Products.asp**.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Footnote 4: The executive summary relies upon and updates materials prepared for the 2007 Annual Report published under the administration of Attorney General Jay Nixon.

Executive summary on 2007 Missouri vehicle stops

- Background
- Statewide Findings
- Analysis by Attorney General Nixon
- Appendix A: Local traffic stops in proportion to state racial composition
- Appendix B: Disparity indexes for 2000-2007 are compared
- Appendix C: Key indicators using 2000 census figures for each jurisdiction

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2007 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Population	4,632,578	3,888,907	496,788	102,685	69,553	22,563	52,082
Stops	1,564,452	1,240,821	264,307	34,609	12,651	1,478	10,586

Disparity index	- - -	.95	1.58	1.00	.54	.18	.62
Search rate	7.91%	6.86%	12.26%	14.96%	3.45%	10.83%	4.56%
Contraband hit rate	21.17%	23.01%	17.60%	14.40%	14.68%	24.38%	13.66%
Arrest rate	5.72%	4.92%	9.08%	11.01%	2.36%	7.37%	2.88%

Notes: Population figures are 2007 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from **636 law enforcement agencies** in Missouri for 2007. An additional 53 agencies indicated they made no vehicle stops during the year. This represents almost 97 percent of the 711 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,564,452 vehicle stops, resulting in 123,808 searches and 89,537 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

The population totals in the table are census estimates for 2007 compiled by Geolytics Inc. In reports for years prior to 2005, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U.S. Census Bureau, “are used in federal funding allocations, **as denominators for vital rates** and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**). **Footnote 2**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the “disparity index,” relates each group’s proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “overrepresented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate underrepresentation. For example, the 1,240,821 whites who were stopped accounted for 79.3 percent of all vehicle stops in 2007.

Whites comprise an estimated 84 percent of Missouri’s driving age population. The value for whites on the disparity index is, therefore, .95 (.79313/.83947). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the estimated population age 16 and older.

The same is not the case for several of the other groups. African-Americans represent 10.7 percent of the population 16 and older but 16.9 percent of all vehicle stops, for a value on the disparity index of 1.58.

African-Americans were stopped at a rate 58 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate equal to their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.66 times that of a white motorist (1.58/.95). In other words, African-Americans were 66 percent more likely than whites to be stopped in 2007.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The statewide disparity indexes for African-Americans show increases over the past several years. Some of this is due to the inclusion of investigative stops in the statewide racial profiling data, which has resulted in an increase in stops of African-Americans in Kansas City and St. Louis.

In 2003, these two jurisdictions accounted for 26 percent of all stops in Missouri of African-American drivers. By 2007 these jurisdictions accounted for 36 percent of all stops of African-American drivers in Missouri.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.9 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped.

The search rates for the groups also can be compared directly with one another. African-Americans were 1.79 times more likely to be searched than whites (12.26/6.86). Hispanics were 2.18 times more likely than whites to be searched (14.96/6.86).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. Contraband was found in slightly more than 20 percent of all searches. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was

found in 21 percent of all searches conducted in 2007. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 23.01 percent, compared with 17.6 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 6 percent of all vehicle stops resulted in an arrest (89,537/1,564,452). The probability of arrest varies across the race and ethnic groups.

There are three appendixes to this year's full report. **Appendix A** presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2007 disparity index to the disparity indexes for 2000 through 2006. **Footnote 3** These comparisons are presented in **Appendix B**.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2006. For the state as a whole, the key indicators show very small changes between 2006 and 2007. The disparity index is generally stable across the two years, with a small increase for African-Americans and a slight decline for Hispanics.

The search rate (the percentage of stops in which a search is conducted) for these groups is nearly identical across the two years. The arrest rate for African-Americans dropped slightly (from 10.07 to 9.08) and rose slightly for Hispanics (from 10.58 percent to 11.01) between 2006 and 2007..

The third appendix included with this year's report, **Appendix C**, presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This report represents the eighth annual analysis of vehicle stop data in Missouri, a review which includes information about more than 1.5 million stops by law enforcement in the state during 2007. This report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

This report, as well as the 2005 and 2006 reports, used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C of this report provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported decreased in 2007, after experiencing a significant increase in 2006. As it has in the past, the disparity index for African-American drivers continues to be of concern. The disparity index for African-American drivers increased from 1.49 in 2006 to 1.58 in 2007. At the same time, the disparity index for Hispanic drivers decreased from 1.09 in 2006 to 1.0 in 2007. Both groups continue to have search rates significantly higher than that of white drivers.

With 636 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

In 2004, state law was changed to require law enforcement to include investigative vehicle stops in their reports, in addition to the stops for traffic violations. As noted earlier in the analysis by the criminology experts who assist in preparing this report, the total stops and the stops of

African-American drivers reported in our two largest cities, St. Louis and Kansas City, have risen since that change in the law.

This is a trend that bears watching, particularly for its impact on the disparity index for African-American drivers in Missouri.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leadership role in collecting and examining vehicle stop data on this scale. We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri's law enforcement members continue to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports. The number of agencies that did not comply with the vehicle stops reporting law continued to be relatively low at 22. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

As I have said in my analysis of previous reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. Missourians of all races and ethnic groups and law enforcement officers from throughout the state are committed to this premise with me.

Executive summary on 2006 Missouri vehicle stops

- **Background**
- **Statewide Findings**
- **Analysis by Attorney General Nixon**
- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2006 are compared**
- **Appendix C: Key indicators using 2000 census figures for each jurisdiction**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Table 1. 2006 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Population	4,498,871	3,783,810	490,250	94,062	62,762	19,697	48,290
Stops	1,603,245	1,280,884	260,899	36,510	12,950	1,320	10,682
Searches	128,377	87,853	34,076	5,380	391	132	545
Arrests	94,286	63,473	26,264	3,862	296	97	294
Statewide population %	100%	84.11%	10.90%	2.09%	1.40%	.44%	1.07%
Disparity index	- - -	.95	1.49	1.09	.58	.19	.62
Search rate	8.01%	6.86%	13.06%	14.74%	3.02%	10.00%	5.10%
Contraband hit rate	21.19%	22.61%	18.72%	14.35%	15.86%	26.52%	16.88%
Arrest rate	5.88%	4.96%	10.07%	10.58%	2.29%	7.35%	2.75%

Notes: Population figures are 2006 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from **635 law enforcement agencies** in Missouri for 2006. **Footnote 1** This represents 90 percent of the 708 law enforcement agencies in the state. (An additional 54 of those agencies indicated they made no vehicle stops during the year.)

The agencies filing reports recorded a total of 1,603,245 vehicle stops, resulting in 128,377 searches and 94,286 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group. **Footnote 2**

The population totals in the table are census estimates for 2006 compiled by Geolytics Inc. In reports for years prior to 2005, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U.S. Census Bureau, “are used in federal funding allocations, **as denominators for vital rates** and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**). **Footnote 3**

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the “disparity index,” relates each group’s proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “overrepresented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate underrepresentation. For example, the 1,280,884 whites who were stopped accounted for 79.9 percent of all vehicle stops in 2006.

Whites comprise an estimated 84.1 percent of Missouri’s driving age population. The value for whites on the disparity index is, therefore, .95 (.7989107/.8410582). Whites were stopped, in other words, at slightly below the rate we would expect based on their fraction of the estimated population age 16 and older.

The same is not the case for several of the other groups. African-Americans represent 10.9 percent of the population 16 and older but 16.3 percent of all vehicle stops, for a value on the disparity index of 1.49. African-Americans were stopped at a rate 49 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.57 times that of a white motorist (1.49/.95). In other words, African-Americans were 57 percent more likely than whites to be stopped in 2006.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not on the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 8.01 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped. The search rates for the groups also can be compared directly with one another. African-Americans were 1.90 times more likely to be searched than whites (13.06/6.86). Hispanics were 2.15 times more likely than whites to be searched (14.74/6.86).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. Contraband was found in just over 20 percent of all searches. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 21 percent of all searches conducted in 2006. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22.6 percent, compared with 18.7 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just under 6 percent of all vehicle stops resulted in an arrest (94,286/1,603,245). The probability of arrest varies across the race and ethnic groups.

Between 10 percent and 11 percent of the stops of African-Americans and Hispanics resulted in arrest, compared with 5 percent of the stops of whites. African-Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

There are three appendixes to this year's full report. **Appendix A** presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2006 disparity index to the disparity indexes for 2000 through 2005. **Footnote 4** These comparisons are presented in **Appendix B**.

For each agency, the disparity index for each raceethnic group is presented for 2000-2005. For the state as a whole, the key indicators show very small changes between 2005 and 2006. The disparity index is generally stable across the two years, with small increases for African-Americans and Hispanics.

The search rate (the percentage of stops in which a search is conducted) for these groups also grew somewhat. This increase may reflect the higher arrest rates for African-Americans and Hispanics in 2006 (10.1 percent and 10.6 percent, respectively) compared with 2005 (8.2 percent and 8.6 percent, respectively).

The third appendix included with this year's report, **Appendix C**, presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic populations.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This report represents the seventh annual analysis of vehicle stop data in Missouri, a review which includes information about more than 1.6 million stops by law enforcement in the state during 2006. This report can be compared to data going back to 2000 on the Attorney General's Web site at **ago.mo.gov**.

Both this report and the 2005 report used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C, found in Volume 9, provides key indicators by each agency using the 2000 census information.)

The overall number of stops reported grew again significantly in 2006. The number grew from just over 1.5 million in 2005 to more than 1.6 million in 2006. A part of this increase could be explained by a change in the law that took effect in August 2004 that requires reporting of a wider variety of stops, including investigative stops. Another explanation might lie in better reporting methods used by various agencies.

As I have said in previous years, the disparity index for African-American and Hispanic drivers continues to be of concern. The disparity index for African- American drivers increased from 1.42 in 2005 to 1.49 in 2006, while the disparity index for Hispanic drivers increased from .97 in 2005 to 1.09 in 2006. Both groups continue to have search rates about twice that of white drivers.

With 635 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

One of the best uses of these reports is as a springboard for dialogue and communication between law enforcement agencies and the communities they serve. It is vital that Missouri law enforcement agencies continue to review the rates of stops and searches and to continue their outreach efforts.

Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver. The compilation and analysis of data, however, does help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

I am proud that Missouri took a leadership role in collecting and examining vehicle stop data on this scale. We continue to show that commitment through laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Missouri law enforcement continues to do commendable work in the face of many challenges. I appreciate their efforts and willingness to compile the information for these annual reports. The number of agencies that did not comply with the vehicle stops reporting law dropped this year, from 32 to 19, a positive development. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

Along with the data, several individual law enforcement agencies provided other information about factors that may impact their numbers. The reader should consider these factors when examining the data.

As I have said in my analysis of previous reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. Missourians of all races and ethnic groups and law enforcement officers from throughout the state are committed to this premise with me.

Executive summary on 2005 Missouri vehicle stops

- **Background**
- **Statewide Findings**
- **Analysis by Attorney General Nixon**
- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2005 are compared**
- **Appendix C: Key indicators using 2000 census figures for each jurisdiction**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice at the University of Missouri-St. Louis; Richard Rosenfeld, professor of criminology and criminal justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor of criminal justice at the University of South Carolina.

Table 1. 2005 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,545,075	3,829,501	483,007	100,745	62,690	20,933	48,199

Stops	1,504,274	1,222,924	226,779	32,428	11,654	1,337	9,152

Contraband hit rate	22.03%	23.60%	18.61%	14.52%	14.76%	23.85%	19.47%
Arrest rate	5.44%	4.88%	8.29%	8.58%	2.27%	5.31%	2.53%

Notes: Population figures are 2005 census estimates for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from **624 law enforcement agencies in Missouri** for 2005. An additional 48 agencies submitted letters indicating they made no vehicle stops during the year. These 672 agencies represent 95.5 percent of the 704 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,504,274 vehicle stops, resulting in 119,872 searches and 81,777 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group.[1]

The population totals in the table are census estimates for 2005 compiled by Geolytics Inc. In previous reports, the population totals were from the 2000 census. The estimated totals are used in this report to reflect population change in Missouri since 2000. “These estimates,” according to the U.S. Census Bureau, “are used in federal funding allocations, **as denominators for vital rates** and per capita time series, as survey controls, and in monitoring recent demographic changes” (emphasis added; see **www.census.gov/popest/estimates.php**).[2]

Four summary indicators are included in Table 1 that may be useful in initiating further assessments of racial profiling in vehicle stops. The first, termed the “disparity index,” relates each group's proportion of total vehicle stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “over-represented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,222,924 whites who were stopped accounted for 81.3 percent of all vehicle stops in 2005.

Whites comprise an estimated 84.3 percent of Missouri's driving-age population. The value for whites on the disparity index is, therefore, .97 (.813/.842). Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African-Americans represent 10.6 percent of the population 16 and older but 15.1 percent of all vehicle stops, for a value on the disparity index of 1.42.

African-Americans were stopped at a rate 42 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate slightly below their population proportion, and Asians, American Indians and persons of mixed or unknown race were stopped at a rate well below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.46 times that of a white motorist (1.42/.97). In other words, African-Americans were 46 percent more likely than whites to be stopped in 2005.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not of the population of motorists on the state's streets, roads and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the “search rate,” or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.) The search rate for all motorists who were stopped is 7.97 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists who were stopped.

The search rates for the groups also can be compared directly with one another. African-Americans were 1.78 times more likely to be searched than whites (12.52/7.03). Hispanics were 1.98 times more likely than whites to be searched (13.91/7.03).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding warrant.

The third summary indicator, the “contraband hit rate,” reflects the percentage of searches in which contraband is found. Contraband was found in 22 percent of all searches conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 23.6 percent, compared with 18.6 percent for African-Americans and 14.5 percent for Hispanics. This means that on average, searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The “arrest rate” is the **fourth summary indicator** included in Table 1 that may be useful for assessing racial profiling. Just over 5 percent of all vehicle stops resulted in an arrest (81,777/1,504,274). The probability of arrest varies across the race and ethnic groups.

Between 8 percent and 9 percent of the stops of African-Americans and Hispanics resulted in arrest, compared with just under 5 percent of the stops of whites. African-Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

There are three appendixes to this year's full report. **Appendix A** presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year's report compares the 2005 disparity index to the disparity indexes for 2000 through 2004.[3] These comparisons are presented in **Appendix B**.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2005. For the state as a whole, the key indicators show very small changes between 2004 and 2005. The disparity index is highly stable across the two years. The search rate (percentage of stops in which a search is conducted) for American Indians in 2005 drops to 8.2 percent from 9.7 percent in 2004. This decrease may reflect the lower arrest rate for American Indians in 2005 (5.3 percent) than in 2004 (6.9 percent).

This year a new appendix is included, **Appendix C**. This appendix presents the key indicators using the 2000 census figures for each jurisdiction's race and ethnic proportions.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This is the sixth annual analysis of vehicle stop data in Missouri under a law passed in 2000 by the General Assembly. This report can be compared to all the previous reports on the Attorney General's Web site at **www.ago.mo.gov**.

This report uses census estimates for 2005 to reflect the changes in Missouri's population since the 2000 census, which was the benchmark for the previous five reports. As our state's population grows, these census estimates can help provide a more accurate benchmark to analyze the data. (Appendix C, found in Volume 8, provides key indicators by each agency using the 2000 census information.)

The statewide statistics for 2005 show some notable changes from previous years that were analyzed. The overall number of stops cataloged went from just under 1.37 million in 2004 to just over 1.5 million in 2005, an increase of 10 percent. A part of this increase could be explained by a change in the law that took effect in August 2004 that requires reporting of a wider variety of stops, including investigative stops.

The other notable changes contained in the 2005 report are in the disparity indexes for stops of African-American and Hispanic drivers. The disparity index for African-American drivers increased from 1.34 in 2004 to 1.42 in 2005, while the disparity index for Hispanic drivers decreased from 1.07 in 2004 to .97 in 2005. Both groups continue to have higher search rates than that of white drivers.

I encourage Missouri law enforcement agencies to continue their ongoing review of the rates of stops and searches and to continue outreach efforts in promoting effective communications with the communities they serve. Statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver.

The compilation and analysis of data, however, do help both law enforcement and the community with a starting point for dialogue to appreciate each other's perspective and arrive at common ground.

Missouri continues to be the national leader in collecting and examining vehicle stop data on this scale. We also are committed to eliminating racial disparities through state laws that require each law enforcement agency to not only have a written policy regarding racial profiling, but also to provide additional training to officers and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

I greatly appreciate the efforts and willingness of Missouri law enforcement to collect the data on these 1.5 million vehicle stops. These agencies continue to do a difficult job well, even in the face of funding and staffing challenges.

Agencies were encouraged to submit their data online to my office, providing increased efficiency for the law enforcement agency and for the Attorney General's Office. Perhaps relatedly, the number of agencies not complying with the vehicle stops reporting law dropped to 32 from 64 in 2004, an encouraging sign. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions.

As in years past, this report provides individual law enforcement agencies with the opportunity to provide a synopsis of factors that may impact their numbers. The reader should consider these factors when examining the data.

As I have said in my analysis of previous reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. Missourians of all races and ethnic groups and law enforcement officers from throughout the state are committed to this premise with me.

[**back to top**]

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the “other” category along with persons of unknown race.

Footnote 2: For detailed descriptions of the methodology used in forming the population estimates, see **www.census.gov/popest/topics/methodology/2004_su_meth.html** and **www.geolytics.com/USCensus,Estimates-Projections,Data,Methodology,Products.asp**.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Executive summary on 2004 Missouri vehicle stops

- **Background**
- **Statewide Findings**
- **Analysis by Attorney General Nixon**
- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2004 are compared**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice; Richard Rosenfeld, professor of criminology and criminal justice; and Jeffrey Rojek, doctoral candidate in criminology and criminal justice; all at the University of Missouri-St. Louis.

Table 1. 2004 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,331,937	3,692,696	444,024	80,094	50,593	17,951	46,579
Stops	1,365,575	1,129,748	187,704	26,967	10,748	1,122	9,286

Searches	106,430	79,448	22,567	3,488	337	109	481
Arrests	74,484	56,521	15,079	2,268	250	77	289
Statewide population %	100%	85.24%	10.25%	1.85%	1.17%	.41%	1.08%
Disparity index	- - -	.97	1.34	1.07	.67	.20	.63
Search rate	7.79%	7.03%	12.02%	12.93%	3.14%	9.71%	5.18%
Contraband hit rate	20.61%	22.43%	15.33%	14.36%	14.84%	13.76%	15.80%
Arrest rate	5.45%	5.00%	8.03%	8.41%	2.33%	6.86%	3.11%

Notes: Population figures are from the 2000 census for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

The 2004 Annual Report on Missouri Traffic Stops summarizes the data from 603 law enforcement agencies in Missouri for 2004. This represents 83 percent of the 728 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,365,575 traffic stops, resulting in 106,430 searches and 74,484 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group1.

Four summary indicators are included in **Table 1** that may be useful in initiating further assessments of racial profiling in traffic stops.[2] The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither “under-represented” nor “over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,129,748 whites who were stopped accounted for 82.7 percent of all traffic stops in 2004.

According to the 2000 census, [3] whites comprise 85.2 percent of Missouri's driving-age population. The value for whites on the disparity index is, therefore, .827/.852 or .97. Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African-Americans represent 10.3 percent of the population 16 and older but 13.7 percent of all traffic stops, for a value on the disparity index of 1.34.

African-Americans were stopped at a rate 34 percent greater than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians and persons of mixed or unknown race were stopped at a rate below their proportion of the driving-age population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.38 times that of a white motorist (1.34/.97). In other words, African-Americans were 38 percent more likely than whites to be stopped in 2004.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not of the population of motorists on the state's streets, roads, and highways.

A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.79 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists stopped.

The search rate for the groups also can be compared directly with one another. African-Americans were 1.71 times more likely to be searched than whites (12.02/7.03). Hispanics were 1.84 times more likely than whites to be searched (12.93/7.03).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. These searches are almost always performed when there is an outstanding warrant.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 20.6 percent of all searches conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22.4 percent, compared with 15.3 percent for African-Americans and 14.4 percent for Hispanics. This means that on average searches of African-Americans and Hispanics are less likely than searches of whites to produce contraband. This difference is most likely attributable to the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in **Table 1** that may be useful for assessing racial profiling. Just over 5 percent of all traffic stops resulted in an arrest (74,484/1,365,575). The probability of arrest varies across the race and ethnic groups.

Between 8 percent and 9 percent of the stops of African-Americans and Hispanics resulted in arrest, compared with 5 percent of the stops of whites. African-Americans and Hispanics are stopped and searched more often than whites, but they also are arrested more often.

This year's report compares (PDF file 19,722K) the 2004 disparity index to the disparity indexes for 2000-2003.[4]

For each agency, the disparity index for each race-ethnic group is presented for 2000-2003. For the state as a whole, the key indicators show very small changes between 2003 and 2004. The disparity index is highly stable across the two years. The search rate (percentage of stops in which a search is conducted) for American Indians drops to 9.7 percent in 2004 from just below 12 percent in 2002.

The arrest rate for American Indians also falls from 9.5 percent in 2003 to 6.9 percent in 2004. The contraband hit rate (percentage of searches in which contraband is found) for persons of other or mixed race fell from 22.7 percent to 15.8 percent.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This report is the fifth annual analysis of traffic stops in Missouri issued by the Attorney General's Office under Section 590.650 RSMo (2000). All previous reports, which date back to 2000, can be linked from this page to compare reports from year to year.

Viewing the statewide statistics for 2004 as a whole shows there was little change from previous years. The analysis of data from 2004 continues to show some degree of disparity in stop and search rates, particularly in the rates at which African-American drivers are stopped and at which African-American and Hispanic drivers who are stopped are then searched (although the rates in all three of these categories declined somewhat from 2003 to 2004). The continued disparity in stops and searches of these groups of drivers should be cause for ongoing review by law enforcement.

It is vital to keep in mind that statistical disproportion does not prove that law enforcement officers are making traffic stops based on the perceived race or ethnicity of the driver. Racial profiling, whether as an agency policy or as a practice by individual officers, cannot be proved or disproved by statistics alone. That said, analysis of the data — particularly the data supplied by individual law enforcement agencies — has proven, for the past five years, to be a springboard for constructive dialogue between the agencies and the communities they serve.

Missouri was the first state in the nation to undertake such analysis on this scale, and our state continues to be a national leader in committing resources to assess traffic stops and eliminate racial disparities. State law also requires every agency to not only have a written policy regarding racial profiling, but also to provide training to officers, and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Law enforcement agencies in Missouri have overwhelmingly complied with the law requiring reporting of traffic stop data, both by collecting the data and by working with the Attorney General's Office to ensure that our analysis is as accurate as possible. I greatly appreciate the efforts of law enforcement, which have been carried out during a time when many agencies are understaffed and underfunded. In addition, it is important to note that fears that requiring collection of traffic stop information would result in "depolicing" — a willful refusal of law enforcement to carry out its duties — have proven to be unfounded, as the number of stops has remained largely stable.

I am concerned that the number of agencies that did not comply with the law by meeting the reporting deadlines increased from 56 in 2003 to 70 in 2004. A list of these agencies has been turned over to the Governor for imposition of the statutory sanctions. In 2004, the Missouri Department of Public Safety withheld more than $7,200 from 16 non-complying agencies that received state funding.

Section II of this report, titled Statewide Findings, provides an analysis of the 2004 data, and compares that information to prior years. This analysis is done statewide and is not a reflection on any individual jurisdiction. In addition, as with any statistical analysis, there are limitations in the data.

For example, I remind readers of this report that the residential demographics for both the state and individual jurisdictions are taken from the 2000 census. The accuracy of this census in reflecting the true demographics of Missouri will lessen with each passing year. In particular, many areas of Missouri (and the United States) have experienced a marked rise in their Hispanic population. For the state as a whole, an examination of the 2004 population estimates indicate that the 2000 census figures remain a reliable basis for estimating the rate at which drivers of different race and ethnic groups are stopped by the police. However, the 2000 figures may be less accurate for particular localities.

Almost every jurisdiction will have factors that may necessitate increased law enforcement patrols in certain areas or impact the demographics of drivers using its streets and thoroughfares. Agencies are given an opportunity in this report to provide a synopsis of that information.

In conclusion, I must reiterate what I have said in my analysis of each of these reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I join with law enforcement officers from all parts of our state and with Missourians of all races in this commitment.

[**back to top**]

FOOTNOTES

Footnote 1: The figures for whites, blacks, Asians, and American Indians in the table represent the number of non-Hispanic persons 16 and older who designated that race alone in the 2000 census. Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: Investigative stops are included in the 2004 report for the first time as a separate category for the "reason" for a stop. However, since the majority of agencies reported no such stops for the four-month period during which these data were collected, they are not included in the statewide figures, but investigative stops are included in the tables for each jurisdiction. We anticipate that with a full year of collecting this information in 2005, it will be included in the statewide figures for that year.

Footnote 3: Geolytics Inc. provided estimated 2004 populations for whites, African-Americans and Hispanics. Estimated totals for other races were unavailable. No substantively meaningful differences in the statewide results were found when the estimated population figures were substituted for the 2000 census figures. Therefore, to maintain continuity with previous reports, the census-year population counts are used for the 2004 report. In future years, however, estimated population totals may be substituted.

Footnote 4: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for 2001-2004 are based on the full calendar year.

Executive summary on 2003 Missouri vehicle stops

- **Background**
- **Statewide Findings**
- **Analysis by Attorney General Nixon**
- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2003 are compared**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice; Richard Rosenfeld, professor of criminology and criminal justice; and Jeffrey Rojek, doctoral candidate in criminology and criminal justice; all at the University of Missouri-St. Louis.

Search rate	7.78%	6.91%	12.44%	13.73%	3.29%	11.89%	5.02%
Contraband hit rate	21.60%	23.19%	17.47%	14.62%	14.87%	24.09%	22.97%
Arrest rate	5.49%	4.91%	8.68%	8.92%	2.43%	9.46%	3.09%

Notes: Population figures are from the 2000 census for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

The 2003 Annual Report on Missouri Traffic Stops summarizes the data from 616 law enforcement agencies in Missouri for 2003. This represents 85 percent of the 725 law enforcement agencies in the state. (An additional 53 of those agencies submitted letters indicating they made no traffic stops during the year). The agencies filing reports recorded a total of 1,360,814 traffic stops, resulting in 105,821 searches and 74,663 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group.[1]

Four summary indicators are included in **Table 1** that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither “under-represented” nor “over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,123,121 whites who were stopped accounted for 82.5 percent of all traffic stops in 2003.

According to the 2000 census, whites comprise 85.2 percent of Missouri's driving-age population. The value for whites on the disparity index is, therefore, .826/.852 or .97. Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.[2]

The same is not the case for several of the other groups. African-Americans represent 10.3 percent of the population 16 and older but 14 percent of all traffic stops, for a value on the disparity index of 1.36. African-Americans were stopped at a rate 36 percent higher than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians and persons of mixed or unknown race were stopped at a rate below their proportion of the population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.4 times that of a white motorist (1.36/.97). In other words, African-Americans were 40 percent more likely

than whites to be stopped in 2003.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). (Searches include searches of drivers or property in the vehicle.)

The search rate for all motorists who were stopped is 7.78 percent. Asians were searched at a rate well below the statewide average, and African-Americans, Hispanics and American Indians were searched at rates above the average for all motorists stopped.

The search rate for the groups also can be compared directly with one another. African-Americans were 1.8 times more likely to be searched than whites (12.44/6.91). Hispanics were roughly twice as likely as whites to be searched (13.73/6.91).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means there is no other reason given for the search other than arrest. These searches are almost always performed when there is an outstanding warrant.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 21.6 percent of all searches conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups. The contraband hit rate for whites was 23.2 percent, compared with 17.5 percent for African-Americans and 14.6 percent for Hispanics. This means that on average searches of African-Americans and Hispanics produce less contraband than do those of whites. This difference is most likely attributable to the higher arrest rates for African-Americans and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in **Table 1** that may be useful for assessing racial profiling. Five and one-half percent of all traffic stops resulted in an arrest (74,663/1,360,814). The probability of arrest varies across the race and ethnic groups. Just under 9 percent of the stops of African-Americans and Hispanics resulted in arrest, compared with roughly 5 percent of the stops of whites. African-Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

This year's report compares (PDF file 1,680K) the 2003 disparity index to the disparity indexes for 2002, 2001 and 2000.[3]

For each agency, the disparity index for each race-ethnic group is presented for 2000, 2001 and 2002. For the state as a whole, the key indicators show only small changes between 2002 and 2003. The disparity index is highly stable across the two years. The contraband hit rate (the fraction of searches in which contraband is found) for Hispanics drops to 14.6 percent in 2003 from 17.6 percent in 2002.

The arrest rate rises for American Indians to 9.5 percent from 5.9 percent in 2002. The search rate for American Indians exhibits a corresponding increase between 2002 and 2003 (7.8 percent to 11.9 percent).

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those

local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This report is the fourth annual analysis of traffic stops in Missouri issued by the Attorney General's Office under Section 590.650 RSMo (2000). This report and those for 2002 and 2001 contain 12 months of data; the report for 2000 includes data from the date the law took effect (Aug. 28, 2000).

When viewed as a whole, the statewide statistics for 2003 remained largely unchanged from 2002 and 2001. The analysis of data from 2003 continues to show some degree of disparity in stop and search rates, particularly in the rates at which African-American drivers are stopped and at which African-American and Hispanic drivers who are stopped are then searched.

It is vital to keep in mind that statistical disproportion does not prove that law enforcement officers are making traffic stops based on the perceived race or ethnicity of the driver. Racial profiling, whether as an agency policy or as a practice by individual officers, cannot be proved or disproved by statistics alone. That said, analysis of the data — particularly the data supplied by individual law enforcement agencies — has proven, for the past five years, to be a springboard for constructive dialogue between the agencies and the communities they serve.

Missouri was the first state in the nation to undertake such analysis on this scale (more than 4.5 million traffic stops have been included in the traffic stops reports to date) and our state continues to be a national leader in committing resources to assess traffic stops and eliminate racial disparities. State law also requires every agency to not only have a written policy regarding racial profiling, but also to provide training to officers, and to promote the use of effective, non-combative methods for carrying out their duties in a racially and culturally diverse environment.

Law enforcement agencies in Missouri have overwhelmingly complied with the law requiring reporting of traffic stop data, both by collecting the data and by working with the Attorney General's Office to ensure that our analysis is as accurate as possible. In addition, it is important to note that fears that requiring collection of traffic stop information would result in "depolicing" — a willful refusal of law enforcement to carry out its duties — have proven to be unfounded.

A **list** of 56 agencies that did not meet reporting deadlines — down from 59 in 2002 — has been turned over to the Governor for imposition of the statutory sanctions. In 2003, the Missouri Department of Public Safety withheld more than $7,100 from 17 non-complying agencies that received state funding.

Section II of this report, titled Statewide Findings, provides an analysis of the 2003 data, and compares that information to prior years. This analysis is done statewide and is not a reflection on any individual jurisdiction. In addition, as with any statistical analysis, there are limitations in the data that caution against drawing conclusions on less than the overall study.

Almost every jurisdiction will have factors that may necessitate increased law enforcement patrols in certain areas or impact the demographics of drivers using its streets and thoroughfares. Agencies are given an opportunity in this report to provide a synopsis of that information.

Finally, readers of this report should note that the residential demographics for both the state and individual jurisdictions are taken from the 2000 census. The accuracy of this census in reflecting the true demographics of Missouri will lessen with each passing year, particularly as the Hispanic population of both our state and the United States continues to grow.

In conclusion, I must reiterate what I have said in my analysis of each of these reports: law-abiding drivers have the right to travel throughout Missouri without the fear that they will be stopped based solely on their race or ethnicity. I join with law enforcement officers from all parts of our state and with Missourians of all races in this commitment.

[**back to top**]

FOOTNOTES

Footnote 1: The figures for whites, blacks, Asians, and American Indians in Table 1 represent the number of non-Hispanic persons 16 and older who designated that race alone in the 2000 census. Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: It remains appropriate to use the 2000 census population figures for the 2003 report. In future years, however, estimated population totals may be substituted.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for 2001, 2002 and 2003 are based on the entire year.

Executive summary on 2002 Missouri vehicle stops

- **Background**
- **Statewide Findings**
- **Analysis by Attorney General Nixon**
- **Appendix A: Local traffic stops in proportion to state racial composition**
- **Appendix B: Disparity indexes for 2000-2002 are compared**

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice; Richard Rosenfeld, professor of criminology and criminal justice; and Jeffrey Rojek, doctoral candidate in criminology and criminal justice; all at the University of Missouri-St. Louis.

Table 1. 2002 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,331,937	3,692,696	444,024	80,094	50,593	17,951	46,579
Stops	1,369,185	1,130,546	191,025	26,752	10,992	1,303	8,567

Searches	108,539	79,775	24,041	3,824	359	103	437
Arrests	79,576	57,400	18,817	2,690	271	79	319
Statewide population %	100%	85.24%	10.25%	1.85%	1.17%	.41%	1.08%
Disparity index	- - -	.97	1.36	1.05	.68	.23	.58
Search rate	7.93%	7.06%	12.59%	14.29%	3.27%	7.90%	5.10%
Contraband hit rate	21.08%	22.60%	17.47%	17.26%	14.76%	26.21%	19.91%
Arrest rate	5.81%	5.08%	9.85%	10.06%	2.47%	6.06%	3.72%

Notes: Population figures are from the 2000 census for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 620 law enforcement agencies in Missouri for 2002. This represents 86 percent of the 720 law enforcement agencies in the state. (An additional 41 of those agencies submitted letters indicating they made no traffic stops during the year.) The agencies filing reports recorded 1,369,185 traffic stops, resulting in 108,539 searches and 79,576 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group.[1]

Four summary indicators are included in **Table 1** that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the driving-age population 16 and older.

A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither “under-represented” nor “over-represented” in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 1,130,546 whites who were stopped accounted for 82.6 percent of all traffic stops in 2002.

According to the 2000 census, whites comprise 85.2 percent of Missouri's driving-age population. The value for whites on the disparity index is, therefore, .826/.852 or .97. Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African-Americans represent 10.3 percent of the population 16 and older but 14 percent of all traffic stops, for a value on the disparity index of 1.36. African-Americans were stopped at a rate 36 percent higher than expected based solely on their proportion of the population 16 and older. Hispanics were stopped at a rate slightly above their population proportion, and Asians, American Indians and persons of mixed or unknown race were stopped at a rate below their proportion of the population.

The values on the disparity index for the groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.4 times that of a white motorist (1.36/.97). In other words, African-Americans were 40 percent more likely than whites to be stopped in 2002.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to assess racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). The search rate for all motorists who were stopped is 7.93 percent. Whites and American Indians were searched at rates close to the statewide average. (Searches include searches of drivers or property in the vehicle.) Asians were searched at a rate well below the statewide average, and blacks and Hispanics were searched at rates above the average for all motorists who were stopped.

The search rate for the different groups also can be compared directly with one another. Blacks were 1.78 times more likely to be searched than whites (12.59/7.06); Hispanics were more than twice as likely as whites to be searched (14.29/7.06).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest — this means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding warrant.

The third summary indicator, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband is found in 21.1 percent of all searches conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22.6 percent, compared with 17.5 percent for blacks and 17.3 percent for Hispanics. This means that, on average, searches of blacks and Hispanics produce less contraband than do those of whites. This difference is most likely attributable to the higher arrest rates for blacks and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in **Table 1** that may be useful for assessing racial profiling. Just under 6 percent of all traffic stops resulted in an arrest (79,576/1,369,185). The probability of arrest varies across the race and ethnic groups. Approximately 10 percent of the stops of African Americans and Hispanics resulted in arrest, compared with about 5 percent of the stops of whites. African Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

This year's report compares (PDF file 1,465K) the 2002 disparity index to the disparity indexes for 2002, 2001 and 2000.[2]

For each agency, the disparity index for each race-ethnic group is presented for the years 2000, 2001 and 2002. For the state as a whole, the key indicators show only small changes between 2001 and 2002. The largest change is registered in the contraband hit rate (the fraction of searches in which contraband is found) for Hispanics. In 2001, 10.6 percent of searches of Hispanics resulted in contraband, compared with a contraband hit rate of 17.3 percent for Hispanics in 2002.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

This is the third annual analysis of traffic stops issued by the Attorney General's Office under Section 590.650 RSMo (2000), and the second compiling a full 12 months of data. Our analysis shows the 2002 data confirms the racial disparities reported for 2001, the first full year of data, and does nothing to dispel the prevalent perception that African Americans are stopped at a disproportionate rate compared to whites, and that both African Americans and Hispanics are searched at disproportionately high rates. These disparities remain significant, and are cause for concern.

Statistical disproportion, however, does not prove that law enforcement decisions involving traffic stops are being based solely on inappropriate factors. Racial profiling, as a matter of policy or individual practice, can neither be proved nor disproved by statistics alone. Nevertheless, these statistics provide objective evidence of a disproportion that many perceive to be a result of bias, and should be cause for heightened public awareness and debate about this issue.

In 2000, Missouri became a national leader in committing resources to assessing racial disparities in traffic stops and eliminating them. The overwhelming majority of law enforcement agencies and their officers have diligently complied with Missouri law requiring that this information be collected and have worked with this office to ensure that our analysis is as accurate as possible. In addition, Missouri law now requires every agency to have a written policy regarding racial profiling; to provide additional training to its officers about the prohibition against this practice; and to promote the use of effective, non-combative methods for carrying out law enforcement duties in a racially and culturally diverse environment.

The 2002 data clearly refutes suspicions raised by some that collection of this information would result in "de-policing" or, in other words, a willful refusal of law enforcement officials to do their jobs. Law enforcement officers around the state, despite being outnumbered, overworked, and underpaid, continue to serve the public and faithfully discharge their duties as they always have and, I believe, always will.

Though, as I have noted and as the data shows, there is cause for concern and heightened scrutiny about the disproportionate number of traffic stops involving African Americans as well as the disproportionate number of ensuing searches of African Americans and Hispanics, it is important to note that it is law enforcement agencies and their officers themselves that are supplying this data and reacting to the disparities.

I applaud the efforts of law enforcement in helping to shed light on this issue, and I have referred those **agencies** (59 out of 720) that did not meet the reporting deadlines to the Governor for imposition of the statutory sanctions.

Section II of this report, titled Statewide Findings, provides an analysis of the 2002 data, and compares that information to prior years. This analysis is done statewide and is not a reflection on any individual jurisdiction. In addition, as with any statistical analysis, there are limitations in the data that caution against drawing conclusions on less than the overall study.

Within any jurisdiction — perhaps within every jurisdiction — there are factors such as interstate highways, shopping centers and high-crime areas necessitating increased patrols that can affect the statistics reported. Factors may vary from jurisdiction to jurisdiction that impact the demographics of the drivers in that jurisdiction as opposed to the residents in that jurisdiction. Finally, it should be remembered that the residential demographics are drawn by necessity from the 2000 census, which is an increasingly inaccurate depiction of Missouri demographics today.

Whatever the limitations of the data may be, however, they do not explain the disparities revealed by the data on a statewide basis. I believe that law-abiding Missourians have a right to travel throughout this state without fear that they will be stopped — an inconvenience at best and a humiliation at worst — based solely on their race or ethnicity. I know firsthand that Missourians of all races and law enforcement officers throughout our state share this belief. All of us must work together to ensure that this commitment will soon be reflected in the data that I am required by law to analyze and report.

[**back to top**]

FOOTNOTES

Footnote 1: The figures for whites, blacks, Asians, and American Indians in Table 1 represent the number of non-Hispanic persons 16 and older who designated that race alone in the 2000 Census. Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "Other" category along with persons of unknown race.

Footnote 2: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for 2001 and 2002 are based on the full calendar year.

In memoriam

Col. Jim Nunn
(1950-2002)

Col. Jim Nunn brought steady leadership and humor to the Racial Profiling Committee. Nixon and other members respond.

The Missouri Traffic Stop Report is among the most comprehensive reports of traffic stops documented by race ever produced in the United States. It is dedicated to the late Col. Jim Nunn, who served on the Attorney General's Advisory Committee for Racial Profiling for the year 2000.

Col. Nunn was a former Kansas City deputy police chief and 27-year law-enforcement veteran. He also served as president of MOVE UP, a Kansas City organization dedicated to building neighborhoods and fighting crime.

Col. Nunn provided calm and steady leadership to our committee as we worked for the first time to implement the Missouri data collection law and understand the implications of the data collected. Col. Nunn's insight helped bring a consensus between law enforcement and minority leaders in Missouri and demonstrated that people of good will, despite differing affiliations and views on an issue, can find common ground and learn from one another.

I learned a great deal from Col. Nunn, and his influence on our committee will benefit law enforcement and the state of Missouri for years to come.

Jeremiah W. "Jay" Nixon
Missouri Attorney General

"Too many of our citizens have cause to doubt our nation's justice, when the law points a finger of suspicion at groups, instead of individuals. All our citizens are created equal and must be treated equally. .... It's [racial profiling] wrong and we will end it in America."
President George W. Bush,
State of the Union address, Feb. 27, 2001

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, curator's professor of criminology and criminal justice; Richard Rosenfeld, professor of criminology and criminal justice; and Jeffrey Rojek, doctoral candidate in criminology and criminal justice; all at the University of Missouri-St. Louis.

Table 1. 2001 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,331,937	3,692,696	444,024	80,094	50,593	17,951	46,579
Stops	1,389,947	1,155,266	189,097	24,634	11,184	1,518	8,248
Searches	99,860	74,250	21,698	3,089	325	109	389
Arrests	76,567	55,984	17,788	2,206	216	98	275
Statewide population %	100%	85.24%	10.25%	1.85%	1.17%	.41%	1.08%
Disparity index	- - -	.98	1.33	.96	.68	.27	.56
Search rate	7.18%	6.43%	11.47%	12.54%	2.91%	7.18%	4.71%
Contraband hit rate	20.04%	21.86%	15.34%	10.65%	12.00%	29.36%	14.65%
Arrest rate	5.51%	4.85%	9.41%	8.96%	1.93%	6.46%	3.33%

Notes: Population figures are from the 2000 census for persons 16 and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 10.

[**back to top**]

II. STATEWIDE FINDINGS

This report summarizes the data from 609 law enforcement agencies in Missouri for calendar year 2001. This represents more than 91 percent of the 668 law enforcement agencies in the state. The agencies filing reports recorded a total of 1,389,947 traffic stops, resulting in 99,860 searches and 76,567 arrests. **Table 1** breaks out the stops, searches and arrests by race and ethnic group.[1]

Four summary indicators are included in **Table 1** that may be useful in initiating further assessments of racial profiling in traffic stops. The first, termed the "disparity index," relates each group's proportion of total traffic stops to its proportion of the population age 16 and older.

A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion: it is neither "under-represented" nor "over-represented" in traffic stops. Values above 1 indicate overrepresentation, and those below 1 indicate under-representation.

For example, the 1,155,266 whites who were stopped accounted for 83 percent of all traffic stops in 2001. According to the 2000 Census, whites comprise 85 percent of Missouri's driving age population. The value for whites on the disparity index is, therefore, .83/.85 or .98. Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African Americans represent 10.3 percent of the population 16 years and older but 13.6 percent of all traffic stops, for a value on the disparity index of 1.33. African Americans were stopped at a rate 33 percent higher than expected based solely on their proportion of the population 16 and older.

Hispanics were stopped at a rate nearly equal to their population proportion, and Asians, American Indians, and persons of mixed or unknown race were stopped at a rate below their proportion of the population.

The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that a black motorist was stopped is 1.35 times that of a white motorist (1.33/.98). In other words, Blacks were 35 percent more likely than whites to be stopped in 2001.

The disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population age 16 and older, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 16 and older may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case.

The extremely low index values for American Indians, for example, could indicate that they are underrepresented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the disparity index will not accurately portray the probability that Missouri residents are stopped.

The second indicator that can be used to begin assessing racial profiling is the "search rate," or the number of searches divided by the number of stops (x 100). The search rate for all motorists who were stopped is 7.18 percent. Whites and American Indians were searched at rates close to the statewide average. (Searches include searches of drivers or property in the vehicle.) Asians were searched at a rate well below the statewide average, and Blacks and Hispanics were searched at rates above the average for all motorists who were stopped.

The search rate for the different groups also can be compared directly with one another. Blacks were 1.78 times more likely to be searched than whites (11.47/6.43). Hispanics were nearly twice as likely as whites to be searched (12.54/6.43).

Conclusions about search rates are difficult to ascertain because there are various reasons for searches and a number of situations that require a search. For example, searches are almost always performed when there is an outstanding warrant or if there is an arrest.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

The third summary indicator, the "contraband hit rate," was added to the 2001 report and did not appear in the 2000 report. The contraband hit rate reflects the percentage of searches in which contraband is found. Contraband is found in 20 percent of all searches that were conducted. However, there is considerable variation in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 22 percent, compared with 15 percent for Blacks and 11 percent for Hispanics. This means that, on average, searches of Blacks and Hispanics produce less contraband than do those of whites. This difference is most likely attributable to the higher arrest rates for Blacks and Hispanics, circumstances that compel a search.

The "arrest rate" is the **fourth summary indicator** included in **Table 1** that may be useful for assessing racial profiling. Just over 5 percent of all traffic stops resulted in an arrest (76,567/1,389,947). The probability of arrest varies across the race and ethnic groups.

Approximately 9 percent of the stops of African Americans and Hispanics resulted in arrest, compared with about 5 percent of the stops of

whites. African Americans and Hispanics are stopped and searched more often than whites, but they are arrested more often as well.

A final addition to this year's report is a comparison of the 2000 disparity index to the disparity index for 2001. These comparisons are presented in Appendix B (PDF file. You need Acrobat Reader to view it. 1,251K).[2] For each agency, the disparity index for each race-ethnic group is presented for the year 2000 and 2001. These comparisons will allow an assessment of the changes from one year to the next.

However, caution should be used in making such comparisons, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for 2001 are based on the full calendar year.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to stimulate those local evaluations and dialogue.

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

The response to the 2001 traffic data report provides the first opportunity for a full-year analysis of traffic stops in Missouri. Missouri law (Section 590.650, RSMo (2000)) was not enacted until Aug. 28, 2000; thus, the first annual report released June 1, 2001, covers only four months of traffic data.

As noted in Section II: Statewide Findings, the data collected for 2001 clearly shows a disproportionate number of stops of African Americans as well as a disproportionate number of searches of African Americans and Hispanics. The level of disproportion remains significant and it is of concern to me.

Disproportion in and of itself is not necessarily reflective of racial profiling. However, I remain concerned that the inappropriate use of race contributes to this level of disproportion between the stops of African Americans as compared to whites and to the disproportion of the searches of African Americans and Hispanics as compared to whites. The anecdotal information provided by many Missourians of color who perceive a racial profiling problem reinforces my concern.

My office continues to work with statisticians and with law enforcement to collect data that will provide the most accurate analysis possible. Even so, it is appropriate to note that the further away we move from the 2000 census year, the more difficult it will be to accurately analyze our data as populations shift. Breakdowns by race will become less accurate with each passing year.

The analysis I provide is based solely on the statewide statistical breakdown and is not a reflection on any particular jurisdiction. I fully recognize the variety of considerations that will affect local data including the appropriate increased patrol of high crime areas and the presence of interstate highways, large shopping centers or major employers in an area. These factors affect the demographics of the driving population, as opposed to the residential population.

Missouri's data collection and review of traffic stops does provide an opportunity to open dialog between local law enforcement and the communities they serve. Last year, some Missouri communities used the announcement of these statistics as an opportunity to meet with local minority communities and review the data collected as well as local community policing efforts. In addition, law enforcement has an opportunity to use this data internally to review the departmental performance and to aid in evaluation efforts.

Last year, the Missouri legislature added a new component to the state's laws against racial profiling, requiring additional training of law enforcement concerning the prohibition against racial profiling and promoting the use of effective, non-combative methods for carrying out law enforcement duties in a racially and culturally diverse environment. This is a move in the right direction. In addition, the law already requires every department to have a written policy against racial profiling.

I encourage all Missourians to respect the work of our law enforcement officials. In 2001, the Sept. 11 tragedies demonstrated as never before the danger and risk our law enforcement officers face every day as they place themselves in harm's way for our protection. The overwhelming majority of peace officers work hard every day for little pay to carry out their duties with dignity and respect for the rights of all. In responding to this law, most have worked diligently to collect this data with no extra funding or personnel.

Missouri's 2001 report is among the most comprehensive documentation of statewide traffic stops by race ever produced in this country. Missouri leads the way nationally on efforts to record and analyze traffic stops by race and to implement policies prohibiting the inappropriate use of race in police work. The report of a full year of data is an opportunity for all communities to move forward in our race relations, and it is in particular an opportunity for law enforcement in Missouri to work toward efforts to build trust in all communities in our state.

All law-abiding citizens have the right to travel on any and every public thoroughfare in this state. We must continue our efforts to ensure that right as a matter of equal justice under the law.

[**back to top**]

FOOTNOTES

Footnote 1: The figures for whites, Blacks, Asians, and American Indians in Table 4 represent the number of non-Hispanic persons 16 and older who designated that race alone in the 2000 Census. Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "Other" category along with persons of unknown race.

Footnote 2: The figures for 2000 reported in Appendix B have been recalculated using the population age 16 and older to allow direct comparisons with those for 2001.

ABOUT THE LAW AND REPORT

By Attorney General Jay Nixon

I am proud that Missouri is on the forefront of efforts to eliminate racial profiling, which has been defined as the inappropriate use of race when making a decision to stop, search, cite or arrest a person. To the extent that racial profiling occurs, it is an outdated practice that is not consistent with good police work, and it is a practice that is hurtful to a large portion of our population.

Racial profiling is not a visible problem to most white Americans; thus, there has been a tendency by the majority to ignore or dismiss these concerns expressed by African Americans and other people of color. Yet a national poll shows that 77 percent of African Americans believe racial profiling is pervasive. When law-abiding citizens -- including ministers, lawyers, teachers, students and even off-duty police officers -- believe they have been stopped simply because of their race, it focuses attention on a problem that we must address if we are to grow together as a community.

I commend the Missouri legislature for its efforts to address this issue, and I commend Missouri's law enforcement officers, who -- almost without exception -- have made an incredible good-faith effort to comply with this new law. Law enforcement, including the Office of the Attorney General, has undertaken this new challenge without additional funding and for the most part without a blueprint of how to proceed. Missouri is one of only 10 states -- including California, Connecticut, Kansas, Massachusetts, North Carolina, Oklahoma, Rhode Island, Tennessee and Washington -- with legislation that mandates data collection on this issue. Even the federal government and the Department of Justice are only now considering such efforts.

The acceptance and implementation of this law has been greatly aided by the good counsel and advice of the **18-member Attorney General's Advisory Committee on Racial Profiling**. The committee is composed of law enforcement leaders, minority community leaders and interested citizens.[1] The committee has demonstrated that people of good will, despite differing affiliations and views on an issue, can find common ground and learn from one another. I look forward to my continued work with them as we analyze the data presented and consider what steps lie ahead in the process.

Finally, it is important to remember that the vast majority of law enforcement works hard to do the right thing every day under challenging conditions and for little pay. The law enforcement leaders with whom I have worked have been eager and willing to implement this new law in an effort to ensure that good information is provided. Some agencies have gone the additional mile to gather even more data than required by law to ensure better service to their communities and better analysis of their data.

Peace officers in Missouri have been professional and responsible as they work to meet the considerable challenges of being one of the first states in the nation to implement a law of this nature. With their actions they have demonstrated an earnest desire to build trust in all communities and to provide equal justice under the law.

"Too many of our citizens have cause to doubt our nation's justice, when the law points a finger of suspicion at groups, instead of individuals. All our citizens are created equal and must be treated equally. .... It's [racial profiling] wrong and we will end it in America."
President George W. Bush,
State of the Union address, Feb. 27, 2001

I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law **Section 590.650**, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's new state law requires that all peace officers in the state report specific information including a driver's race for each traffic stop made in the state. Law enforcement agencies are required to turn in the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency which does not comply with the law. The information for this report includes data collected throughout the state from Aug. 28-Dec. 31, 2000, as required by law. Subsequent reports will include a full year of data, as required by law.

State law requires that all information be reported to the Attorney General's office by March 1. In an earlier letter to the Governor, Attorney General Jay Nixon listed the agencies that had not, for various reasons, complied with the law by failing to submit racial profiling data.

The summary of statewide racial profiling data has been provided by Scott H. Decker, Ph.D., Criminology and Criminal Justice, University of Missouri-St. Louis; Richard Rosenfeld, Ph.D., Criminology and Criminal Justice, University of Missouri-St. Louis; and Jack McDevitt, College of Criminal Justice, Northeastern University. The analysis of the data is provided by Attorney General Nixon, with consultation from law enforcement officials and community representatives from throughout Missouri and with professional statistical interpretation from Dr. Decker.

[**back to top**]

II. FINDINGS

Table 1. Agencies that did not submit reports as required by state law [2]

Table 1. Agencies that did not submit reports as required by state law		
Altenburg Police Department	Archie Police Department	Canalou Police Department
Clarksburg Police Department	Forest City Police Department	Holland Police Department
Tarkio Police Department	Twin Bridges Police Department	

This report summarizes the data from more than 95 percent of law enforcement agencies in Missouri during a four-month period in 2000.

The agencies filing reports noted a total of 453,189 traffic stops, resulting in 31,906 searches and 23,716 arrests. Table 2 breaks out the stops, searches and arrests by race and ethnic group.

Table 2. 2000 statewide summary of results

Key Indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Population	4,167,519	3,600,107	433,672	75,962	59,603	43,010	41,086
Stops	453,189	377,852	59,945	8,041	3,770	574	3,007
Searches	31,906	23,966	6,601	1,042	96	50	151
Arrests	23,716	17,196	5,404	693	87	228	108
Statewide population %	100%	86.38%	10.41%	1.82%	1.43%	1.03%	.99%
Disparity index	- - -	.97	1.27	.98	.58	.12	.67
Search rate	7.04%	6.34%	11.01%	12.96%	2.55%	8.71%	5.02%

Notes: Population data are for persons age 18 and older. Black, Asian, and American Indian include persons of mixed race. Asian includes Hawaiian and Pacific Islander. Other includes persons of unknown race. The census population figures include persons who designated a single racial classification plus those who designated more than one race. Therefore the population figures for the different racial groups exceed the statewide total and the percentages exceed 100%.

Disparity index = proportion of stops / proportion of population. A value of 1 represents no disparity. Values greater or less than 1 indicate over- and under-representation, respectively. For the state figures (used in this table) the disparity index is based on **state** population 18 and over. For individual agencies the disparity index is based on **local** population 18 and over.[3]

Search rate = (searches / stops) X 100.

Two summary indicators are included that may be useful in initiating further assessments of racial profiling in traffic stops.

The first, termed the "Disparity Index," relates each group's proportion of total traffic stops to its proportion of the population age 18 and older. (Data from the 2000 census for the driving age population were not available at the time this report was produced.) A value of 1 on this index indicates that a group's proportion of traffic stops equals its population proportion; it is neither "under-represented" nor "over-represented" in traffic stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation. For example, the 377,852 whites who were stopped accounted for 83% of all traffic stops.

Table 2 indicates that whites comprise 86% of Missouri's adult population. The value for whites on the Disparity Index is, therefore .83 /.86, or .97.

Whites were stopped, in other words, at just slightly below the rate we would expect based on their fraction of the population.

The same is not the case for several of the other groups. African Americans represent 10.4% of the population 18 years and older, but 13.2%

of all traffic stops, for a value on the Disparity Index of 1.27. African Americans were stopped at a rate 27% higher than expected based solely on their proportion of the population. Hispanics were stopped at a rate nearly equal to their population proportion, and Asians, American Indians, and persons of other or unknown race were stopped at a rate below their proportion of the population. The values on the Index for the different groups can be compared directly to one another. The likelihood that a black motorist was stopped is 1.3 times that of a white motorist (1.27/.97).

THE SECOND INDICATOR that can be used to begin assessing racial profiling is the "Search Rate," or the number of searches divided by the number of stops (x 100). The Search Rate for all motorists who were stopped is 7.04%. Whites, American Indians, and persons of other or unknown race were searched at rates close to the statewide average. (Searches include searches of drivers and of property in the vehicle.) Asians were searched at a rate well below the statewide average, and Blacks and Hispanics were searched at rates above the average for all motorists who were stopped. The search rate for the different groups also can be compared directly with one another. Blacks were 1.7 times more likely to be searched than whites (11.01/6.34). Hispanics were twice as likely as whites to be searched (12.96/6.34).

The Disparity Index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the adult residential population age 18 and over, and not of the population of motorists on the state's streets, roads, and highways. A group's share of the residential population age 18 and over may or may not equal its proportion of drivers. Although in most instances the two proportions should be close, that may not always be the case. The extremely low Index values for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, motorists from other states are stopped on Missouri's roadways. To the extent that out-of-state drivers do not reflect the race and ethnic composition of Missouri's population, the Disparity Index will not accurately portray the probability that Missouri residents are stopped.

The Search Rate is subject to a somewhat different set of considerations. The reasons for conducting a search and the outcome of the search (i.e., discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest. Other searches are conducted incident to arrest -- this means there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding warrant.

Table 2 includes all arrests resulting from traffic stops reported by the agencies. About 5% of all traffic stops resulted in an arrest (23,716/453,189). The probability of arrest varies across the groups. Approximately 9% of the stops of African Americans and Hispanics resulted in an arrest, compared with about 2% of the stops of Asians and 4.5% of those of whites. Although American Indians were stopped infrequently compared with the other groups, 40% of those stops resulted in an arrest. African Americans and Hispanics were stopped and searched more often than whites, but they were arrested more often as well.

[**back to top**]

III. ANALYSIS BY ATTORNEY GENERAL JAY NIXON

Missouri's new law regarding racial profiling was enacted in response to concerns that minorities are inappropriately targeted for traffic stops because of their race. The law directed each law enforcement agency to have a policy against racial profiling. The law was intended to help us learn if racial profiling is occurring in Missouri. This is the first statewide effort to collect data, and it is based on a four-month collection period.

It is worth noting that the collection of this data, its entry into computerized form and the analysis were all undertaken in response to a very short deadline. As this is the first effort on the part of the state to collect and analyze such data, this year's work should be regarded as a baseline measure. With that in mind, there are several findings that should be noted.

First, the data collected clearly show a disproportionate number of stops of African Americans as well as a disproportionate number of searches of African Americans and Hispanics. African Americans were stopped at a rate 27% higher than expected based solely on their proportion in the population. When compared to whites, they were stopped at a rate 30% higher, or they were 1.3 times as likely as whites to be stopped. African Americans were 1.7 times more likely to be searched than whites. Hispanics were twice as likely as whites to be searched.

There is, however, a very real difference between disproportion in the data and racial profiling.

Many officers and police departments will point to a variety of important considerations that will affect their data. These include:

- Increased policing in high crime areas where minorities are often the victims, as well as the perpetrators of crimes. Patrol of "hot spot" areas is an appropriate response to the well-documented fact that crime, and especially violent crime, is heavily concentrated in certain geographic areas.
- The presence of interstate highways, large shopping centers or major employers affect the demographics of the driving population (as opposed to the resident population reported in the census) and will affect the proportionality of stops and arrests.

In addition, in many instances officers have very little discretion on whether to stop or search someone. A motorist exceeding the speed limit by 25 mph is far more likely to be pulled over than one going 2 mph over the limit. A motorist with an outstanding arrest warrant will, and should, be arrested and will, and should, be searched pursuant to that arrest. This is good police work and is important to the safety of the officer.

It also must be noted that for many stops an officer is not even aware of the driver's race until the officer approaches the car. This is particularly true on interstates after dark.

Regardless of the challenges of securing accurate data and the difficulty of analyzing the data once collected, the overall goal to prevent profiling solely on the basis of race is a worthy one. I acknowledge the limits of our information -- we are using a four-month study period and this is the first-ever attempt at data collection in Missouri and one of the first in the country. And, while data alone cannot prove racial profiling, the data collected in this initial study have done nothing to disprove the perception of racial profiling.

In my travels across the state since the enactment of Missouri's Racial Profiling law last August, numerous highly respected members of Missouri's minority community have told me of their personal experiences on our roadways. While anecdotes are not evidence, they do, at a minimum, convey people's perceptions. Anecdotal information, combined with levels of disproportion in the data, leads me to believe that African Americans and Hispanics have in certain instances been the target of racial profiling in Missouri. We in law enforcement must recognize this as a problem and work to eliminate it.

Our work toward that goal has already begun. The collection of statistics and information regarding law enforcement activities has and will continue to increase awareness of and sensitivity to the issue of racial profiling. The implementation of data collection sends a clear message to police and citizens that racial profiling is inconsistent with effective policy and equal protection. In addition, a policy on racial profiling must now be on file in every police department in Missouri. These are important steps in our goal of equal justice under the law.

In addition, the Missouri legislature this year passed new Peace Officers Standards and Training (POST) requirements stating that:

Peace officers who make traffic stops shall be required to receive annual training concerning the prohibition against racial profiling and such training shall promote understanding and respect for racial and cultural differences and the use of effective, non-combative methods for carrying out law enforcement duties in a racially and culturally diverse environment.

We need to do more. Internal analysis of the data by each agency and open dialogue with the community will improve community policing efforts and will help build trust of the police in the communities they serve. The data are useful in:

- Pointing out areas where improvements need to be made in our training of law enforcement officers. For example, these data show that non-white drivers are no more likely to be carrying contraband than are white drivers. Our officers, who may be carrying out their duties not intending to discriminate based on race, should be trained to no longer improperly consider a person's race in deciding whether or not to stop that person.
- Allowing our law enforcement agencies to more effectively supervise their officers on the streets. Thus, information gathered by law enforcement agencies must be reviewed by those agencies, not just at the end of the reporting year, but periodically throughout the year.

- And, most of all, opening or facilitating better communication between our law enforcement agencies and the communities they serve, particularly our minority communities. It is only through such communication that perceptions -- both of law enforcement as well as our community members -- can be changed.

This report represents the valid and good faith attempt by law enforcement in Missouri, including the Office of the Attorney General, to comply with the requirements of Section 590.650 RSMo (2000). And while it is up to each jurisdiction in Missouri to determine what the results mean in individual communities, I am convinced Missouri must do a better job of providing equal justice under the law.

[**back to top**]

FOOTNOTES

Footnote 1: See **Addendum A** for members of the Attorney General's Advisory Committee.

Footnote 2: On April 5, 2001, Attorney General Nixon submitted to Gov. Holden a list of all agencies that had not turned in reports. State law requires reports to be submitted by March 1 and allows the Governor to withhold funds from those that did not comply. Addendum B, following the Executive Summary, shows the lists provided to Gov. Holden on April 5:

- **Police agencies that did not submit annual reports by April 5**.
- **Annual reports received after March 1**.

Footnote 3: The appendix to this report shows the disparity index using comparison of proportion of stops to proportion of state population.

Agency response

The Bel-Nor Police Department provided contract police services for the City of Greendale, MO in 2011. The City of Greendale, population 650, contains a state highway which is heavily traveled. The Bel-Nor Police Department also patrols a state highway that contains the main entrance to the University of Missouri St. Louis, which has a significant impact on the number of vehicles on the roadway.

Agency response

The City of Blue Springs is located in the Kansas City Metropolitan area along Interstate 70 and US 40 Highways. This route is heavily traveled between Kansas City and St. Louis, as well as out-of-state travel. Within the city and in close proximity to the Interstate 70 corridor are many restaurants and retail businesses, including a large shopping complex at Interstate 70 and Adams Dairy Parkway. The City of Blue Springs has made a strong commitment to protect citizens, both residents and non-residents, from racial or bias based profiling. In addition to the mandatory annual Racial Profiling training required by the State of Missouri, the members of the Blue Springs Police Department, both sworn and civilian, have been given additional POST certified training through the course "Cultural Diversity Competency and Racial Profiling for Peace Officers" conducted by Dr. Emmanuel Ngomsi with All World Languages and Cultures, Inc.

Agency response

We have 4 major shopping centers, and 6 strip malls with a total of 175 retail stores and 10 banks. We have 2 major interstate highways that access our city bringing approximately 170,000 vehicles thru our city per day. Our daytime population inflates to approximately 50,000 people. Brentwood is located centrally in the St. Louis Metropolitan area and in close proximity to St. Louis County Government Center, Jail and Courts. The Metro light rail system has a substation in our city with an attached 10 story parking garage that accommodates 1200 parking spaces. Our police department's racial profiling data for 2011 is consistent with data compiled for the past ten years for our police department.

Agency response

The City of Bridgeton is located near Lambert Airport and consists of a small residential population. There are three major interstate highways; namely, 70, 270 and 370 that run through the City. Also, US Highway 67 (Lindbergh), St. Charles Rock Road and Natural Bridge Road are major thoroughfares which also run through the City of Bridgeton. There is a large transient population and work force with many hotels and large industrial employers with in Bridgeton's boundaries.

Agency response

Carterville Police Department has jurisdiction on HH Highway which connects Joplin, Carthage, Webb City and Duenweg. As a crossroads area, we see transient traffic over 80% of the time. We are also responsible for US 249 Highway, which runs through our city.

Agency response

It is our belief that our local population numbers are not reflective of the racial makeup of the driving public in Chesterfield. The City of Chesterfield contains an airport, light industrial area, two large shopping districts, numerous nursing home facilities and a major hospital. All of these draw both employees, and patrons, from outside of our city. In addition, nine miles of Interstate 64 pass through the City of Chesterfield, also adding to the diversity of the driving public.

Agency response

The City of Clayton is the county seat for St. Louis County. It contains the courts, government offices, juvenile detention center and the St. Louis County Justice Center which houses over 1,000 inmates. In addition, Clayton is the home of several major corporations and contains over 6.5 mission square feet of office space and one million square feet of retail. It is estimated that over 80,000 people visit Clayton on a daily basis to work, shop or do business. Most of those visiting Clayton reside in the St. Louis Metropolitan Area. Additionally, a number of major thoroughfares run through Clayton carrying commuters from various parts of the county requiring a significant amount of traffic enforcement: I-170, Forest Park Parkway, Hanley Rd., Brentwood Blvd and Forsyth. Therefore it is felt that, for purposes of this study, the racial makeup of the population should be in direct proportion to that of the St. Louis Metropolitan Area. At the very least the racial breakdown should be in line with that of St. Louis County as a whole, rather than the resident population of the City of Clayton.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. In fact, 60% of all traffic stops made by the Clinton Police Department involve non-resident drivers. In addition, 38% of all traffic stops made by the Clinton Police Department take place on state highways. Given the large number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

Agency response

Crestwood Mo is a community in a large metropolitan area. The racial makeup of the daily commuters in Crestwood does not reflect the racial makeup of the residents of Crestwood. Crestwood has a major thoroughfare (Watson Road/State Route 366) which is used by a large number of non Crestwood residents. It should be noted that 105 different Postal Zip Codes were represented in our stops for the year 2011.

Agency response

The City of Florissant offers many amenities to our citizens and North St. Louis County and St. Louis City residents. Within the Florissant city limits are numerous business districts, shopping centers, restaurants, department stores, supermarkets, and specialty stores all of which employ and serve residents of the entire area. Additionally, numerous arterial roadways, such as county, state and even a portion of an interstate highway service the city and provide access and travel routes for our citizens and neighbors. The majority of traffic stops occur on these roadways. Although Florissant is a culturally diverse community, larger populations of minorities use city services each day that are not accounted for in official figures. The higher ratio of visiting population is due to significantly higher percentages of African-American citizens living in adjacent communities such as Black Jack, Dellwood, Berkeley and Spanish Lake, to name a few. The Ferguson-Florissant and Hazelwood School Districts both have schools located in our city and the student ratio is 85% African-American. When all the factors above are taken into consideration, the traffic stops reflected in our annual report are truly representative of the motoring population that travels in our city.

Agency response

Interstate 44 runs just about the entire length of Franklin County. We do have a Traffic Division that does work traffic on the Interstate and we also do Interdiction and DWI Checkpoints. The ethnicity percentages of individuals traveling I-44 would not match that of those living in Franklin County.

Agency response

Frontenac Police Department contends there are errors in the Disparity Index. Frontenac serves in St. Louis County, which has a population of 19% Black motorists, 77% White motorists and 4% Other. Our traffic stop data is directly in line with St. Louis County demographics. We patrol a two-mile section of I-64, Lindbergh Blvd (a highway), and the large Plaza Frontenac shopping mall. Our total resident population is 3,484 in Frontenac, and another 1,057 residents in our three contract cities of Crystal Lake Park, Huntleigh, and Westwood. Daytime population is much higher, due to our central location within St. Louis County, and the many businesses and major roadways within our jurisdiction.

Agency response

The City of Gladstone contains three sizable apartment complexes along a major thoroughfare through the City that serves as the principal connection to U.S. Highway 169, a well-traveled freeway that connects Gladstone to the City of Kansas City, and links our City to the Kansas City International Airport. These three apartment complexes offer government-subsidized housing that contains a disproportionate percentage of minority tenants. The City of Gladstone is completely surrounded by urban Kansas City, Missouri. There are several apartment complexes located within Kansas City that are immediately adjacent to the City of Gladstone and appear to house significant percentages of minority tenants. Several of these apartment complexes are accessible only via Gladstone city streets, generating significant motor vehicle traffic by motorists - including minorities - through Gladstone. In addition, Gladstone experiences considerable vehicular traffic that originates or terminates within Kansas City and does not involve Gladstone residents or their visitors. The combination of freeway access, being surrounded by metropolitan Kansas City, the concentrations of lower-income minority tenants in three apartment complexes, the visitor traffic generated by these apartments, and traffic generated from outside our City, attracts a higher percentage of motorists - including minorities - than the proportion of minority residents of the City would suggest. The Gladstone Public Safety Department has established and enforces policies to ensure minorities are not disproportionately subject to stops or arrests by our police officers. These policies are reinforced by active supervision and training of our law enforcement officers to assure that racial profiling or other discriminatory behavior does not exist.

Agency response

The State's report indicated a driving-age population demographic for the City of Grandview as 49.9% White, 38.51% Black and 8.34% Hispanic respectively. However, our true driving demographics are affected by two major influences which are not reflected in the census data. The first is that the City of Grandview is a first tier city to Kansas City, MO which is bisected by U.S. 71 hwy; a major corridor direct to the inner city which maintains a high minority population. Much of our evening traffic is made up of motorists traveling to and from the inner city. Secondly, in 2010, the International House of Prayer opened their international university campus in the city center. This campus brings in several thousand very racially diverse students, which operate motor vehicles on our city streets on a daily basis.

Agency response

The City of Hannibal has both the US 61 and US 36 Highways intersecting within its boundaries. In addition, Hannibal is known as “America’s Hometown” and for “Mark Twain” which draws a sizable number of tourists annually. Considering all these factors demonstrates Hannibal’s local population as related to race is an inaccurate representation of what local law enforcement officers encounter in the performance of their duties. The statewide population % concerning race is a more accurate representation of the populace officers interact with during the completion of their duties.

Agency response

In 2010 our African American minority driving population was estimated to be reflective of the 2000 census population of approximately 2.6% (2010 Census numbers for population demographics of individual cities are unavailable and have not been released at this writing) and car stops on African Americans was approximately 14.2% of all traffic stops. This higher percentage disparity is accounted for by the higher percentage of population from Kansas City, which borders our west city limit, that travel to Independence on a daily basis for jobs, destination shopping, and entertainment. Independence has a new Event Arena, presidential library, waterpark, new Sports Center, Independence Center Mall, the very popular Independence Commons Theatres with stadium seating, Bass Pro Complex, Sam's Warehouse, Lowes, Walmart, Home Depot , Target, J.C. Penny and numerous other new retail stores, restaurants, and hotels to name just a few of the draws to this area. The City of Independence has numerous State and Federal Highways that run through it from outlying Kansas City Metro areas. Also as stated Independence has numerous new shopping centers, entertainment centers and a large Shopping Mall and complex that provide entertainment and jobs for the Metro Area that increase and distort our daytime population. The most recent posted 2009 MODOT traffic volume and commercial vehicle counts of I-70 Hwy alone from our western border with Kansas City eastbound to our eastern border with Blue Springs indicate an average daily vehicle count of 115,802 that enter Independence and only 70,091 that proceed eastward meaning that we have an influx of 45,000 vehicles entering Independence as their destination. Assuming these visitors with business in Independence reflect the demographics of neighboring Kansas City it would be logical to assume our daily minority population is much larger and not representative of the census numbers referring only to those who live here. One other point to consider is that the African American population of Independence is growing. A recent Demographic and Housing Estimate updating the 2000 Census shows a population of 5.2% more than double that of 2000. The Independence Police Department does not tolerate racial profiling. Officers receive annual training on cultural challenges and issues. We are committed to ensuring we maintain accountability and integrity of the racial profiling documentary process which indicates the level of professionalism within the Independence Police Department.

Agency response

Some of the contributing factors for the index being over 1 are as follows: Jasper County has several miles of I-44, US 71, State Hwy 96 and State Hwy 43 running through it. We also have 2 major Universities (MSSU, OCC) in our County and several large corporations (Conway Trucking, Tri-State Trucking, Eagle Picher, Leggett and Platt among several other businesses that employ people who do not live in our jurisdiction or state. We border Kansas and Oklahoma. We also have a large mall in Joplin that is in Jasper County. A lot of people traveling through our county, working in our county or going to school in our county do not reside in Jasper County. Our population for Jasper County is approximately 117,404. The Chamber of Commerce estimates that on any given day there are over 200,000 people in our county.

Agency response

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.0 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG office submitted the summary report did not include the new category Stop Outcome "Other", which accounted for 4,608 stops. The Total Stops figure, however, includes stops associated with this new category. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Agency response

Each year the Ladue Police Department evaluates its traffic-stop data to ensure transparency and policy alignment. The Ladue Police Department uses an internal benchmarking strategy that compares each officer's stops against that of similarly assigned officers. This analysis is designed to identify any officer who appears to be targeting drivers of a specific racial group. Given the transient nature of the motor vehicle traffic traveling in and through Ladue, this is the most appropriate benchmarking strategy available to law enforcement. If an officer appears to be stopping an inordinately high percentage of drivers from one particular racial group over another, then that officer may receive additional supervisory attention, become the subject of an administrative inquiry, be disciplined or terminated. I'm happy to report, that in 2011, no Ladue Police Department officer met these criteria. Although some officers stopped higher percentages of African American drivers than others, an equal number of officers stopped lower percentages of African American drivers. None, however, appeared be stopping a specific minority group at a level that would be concerning or require action.

Agency response

Lafayette County (population of 33,381) adjoins, and is directly east of, Jackson County (population of 674,158), a large metropolitan area. Lafayette County is dissected from east to west by Interstate 70, a major national highway. Motorists stopped for violations in Lafayette County represent a much more diverse population than that of Lafayette County itself.

RACIAL PROFILING DATA/2011

Agency: Lake Lafayette Police Dept.

Population: 267
age 16 and over

Agency response

Lake Saint Louis is bordered by I-70 to the north and I-64 bisects the south end. A large shopping center is just north of I-64 and a retail district lies directly to the south. Workers routinely travel both Interstate corridors west to the Wentzville GM Plant and to major employers in O'Fallon and points east. Due to these factors, calculating a disparity index based on comparison of ethnicity of drivers stopped with the ethnicity of the city's population may be misleading due to transient traffic.

Agency response

The 2010 Census lists the City of Maplewood's total population at 8,046 residents. The City of Maplewood's daytime population is significantly higher because the City has over 450 businesses and our central business district is considered a destination retail and entertainment location. Additionally, the Maplewood Commons Shopping Center, which includes but is not limited to; a Super Walmart and Sam's Club, draws numerous customers from surrounding communities.

Agency response

North Kansas City has a list of demographics that make it a challenge to discern meaningful data regarding racial profiling analysis. The city is only 4.5 square miles, with approximately 4,200 residents, however, 6 highways travel through the city limits carrying an estimated 200,000 vehicles a day. Furthermore, the city's daily workforce/daytime population is estimated at 35,000 people at over 1,100 businesses. There is no information regarding the race/sex make up of the daily motorists or the work force. Due to the small size of the department, and the unique "Urban Village" description, we are not able to compare individual officer's statistics with other officers working in a similar environment. We do constantly compare our stop data among our officers, and we also consider the Kansas City, Missouri census data (which surrounds our city limits on all sides) when we are determining the reasonableness of our statistics. Recently, the department conducted research that included demographics from five miles in all directions (simulated city of 100 sq. miles), which resulted in Disparity Indexes close to 1 in all categories.

Agency response

The City of O'Fallon is located in the center of St. Charles County. We have 2 major Interstates – I-70/64 and State Highway 79. O'Fallon also has a major arterial roadway -- MO K -- that connects the 3 highways from north to south and is a major retail corridor. Because of these heavily traveled roadways, our driver population is more diverse than the census population would indicate, making our disparity index artificially high.

Agency response

The Old Monroe Police Department has reason to believe there is a discrepancy in the disparity index, as it is rather high. However this is likely due to the large number of non-local commuters traveling Highway 79 through our jurisdiction.

Agency response

Olivette is a major corridor for the St. Louis Metropolitan area with major interstates and roadways that pass through or are immediately adjacent to the city. These interstates and roadways are the pipeline connecting thousands of people traveling into and through Olivette for business and pleasure purposes. These roadways also serve thousands of motorists throughout the region traveling to and from various destinations. The motorist stopped for traffic violations are more reflective of the population for the entire metropolitan area rather than the resident population of Olivette.

Agency response

The City of Osage Beach is unique in that it lies along the shores of the Lake of the Ozarks, one of the largest man-made lakes in the nation. The City is a major destination resort area and has wide fluctuations in population during the year. The City is also home to Osage Beach Premium Outlets, a shopping mall featuring over 110 stores, which draws tens of thousands of visitors to our city.

Agency response

Our alleged higher than proportional incidence of stops of black citizens centers around the fact that there are 6 food processing plants within a 45 minute drive of Sedalia. The workers live in and around Pettis, Johnson and Saline counties and drive to the plants daily. Tyson Foods of Dresden, Missouri is the largest food processing plant in Pettis County. These plants employ a large number of Hispanic and Black workers. Along with this is the fact that the University of Central Missouri is located in Warrensburg, Missouri in Johnson County. A large number of day and evening students from surrounding counties commute to UCM daily and that both US 65 and 50 Highways cross in Pettis County. While our Disparity Index for black traffic stops is 2.1, this is based on a total of 48 stops of black citizens. That is 4 stops of black citizens per month. Our total traffic stops for the year was 818. Vehicle stops by the Sheriff's Office are based on traffic violations observed, not the possible race of the drivers. The vast majority of the time the race of the people stopped is unknown until the vehicle is actually stopped. Searches are conducted based on the actions of the individuals stopped or incident to lawful arrest. Race is not a factor in deciding who will or will not be asked for consent to search or who will be searched incident to arrest.

RACIAL PROFILING DATA/2011

Agency: Pevely Police Dept.

Population: 4,043

age 16 and over

Agency response

While the population of Platte Woods, MO. is only 370 (by the last count), the daily traffic count is well over 100,000 vehicles per day. I-29, MO 9 Hwy, and both outer roads pass through the City, and currently, Kansas City MO. is running a detour through Platte Woods with all north and southbound traffic for Green Hills Road added to the normal load. While no public schools are in Platte Woods, the busses and parental vehicle traffic also passes through.

Agency response

The City of Raymore, Missouri, maintains the only 24-hour Wal-Mart Supercenter in the entire south Kansas City metropolitan area. The Supercenter services a number of communities, such as Grandview, Raytown, and south Kansas City, all of which have a more racially diverse population than Raymore. It is the position of the Raymore Police Department that any disparities in the proportion of stops/proportion of population can be attributed to the fact that a large portion of the motoring public do not reside within the city limits of Raymore.

Agency response

The City of Richmond Heights is a 2.8 sq. mile city incorporated in 1913 located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly thru it. Highway I-170 runs north and south from U.S. 64 to the city limits of Clayton. Located in Richmond Heights are the Galleria Shopping Mall and the new Boulevard Shopping District. The Galeria Mall and the Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the County Seat for St. Louis County. Thousands of vehicles travel thru Richmond Heights on a daily basis due to its geographic location. Estimated daytime population of Richmond Heights is 26,000.

Agency response

The City of St. Louis is approximately 62 square miles in size and lies at the core of the largest metropolitan area in the state. The City is comprised of 79 diverse neighborhoods and 105 city parks, and is home to a world-class zoo and other major museums and visitor attractions. The City hosts every home game for our three major sports franchises, a multitude of concerts and theatrical performances at various venues, and a set of large regional cultural events which includes the second-largest Mardi Gras celebration in the country. While the data compiled in this report are informative, it is important to note that the disparity indices represent proportions of the vehicle stops divided by the proportions of racial categories within the resident population only. As a result, a high disparity rate does not serve as proof of racial profiling. Department policy prohibits racial profiling and officers must adhere to the policy. Every commissioned member of the Department receives yearly training against the practice of racial profiling, as required both by state law and by Department policy. This training is further supplemented and reinforced by periodic courses in related topics such as cultural diversity, ethics, and tactical communication. The Department continues to work with its officers, local leaders, and community partners to identify best practices as they relate to vehicle stops.

Agency response

While the data compiled in this report is informative, any conclusions drawn from the data must be tempered with common sense. For example, population data used to calculate the disparity index does not include members of the minority community that reside in the City of St. Louis and, therefore, increases the diversity of drivers on the road within St. Louis County. Nor does the data reflect that in a majority of traffic stops, police officers do not know the race of the driver prior to initiating the traffic stop. Our Department policy specifies that race-based detentions, traffic stops, arrests, searches and seizures of property are forbidden. In 2011, our Department received 378,818 calls for service; officers made 20,711 full-custody arrests and 89,151 traffic stops with five complaints of racial profiling. Four of the complaints were unfounded. One case was closed due to the complainant's inability to identify the officer involved. All commissioned officers participate in annual cultural diversity, sensitivity training, and specialized training that prohibits the illegal practice of racial profiling. Supervisors review traffic stop data on a quarterly basis to ensure that officers do not engage in biased based policing.

Agency response

The following conditions may influence minority contacts in St. Peters. Interstate Highway 70 and Missouri Highways 94, 370 and 364 pass through or terminate within the City. Mid-Rivers Mall, a major retail development, is located along Interstate 70 and Highway 370. The community is home to several regionally significant office and professional campuses; and employees of local businesses, commuter traffic and retail customers significantly increase the non-resident driving population.

RACIAL PROFILING DATA/2011
